**Touring the Universe through Binoculars** Philip S. Harrington, 1990-10-01 This comprehensive work takes you on a personal tour of the universe using nothing more than a pair of binoculars More comprehensive than any book currently available it starts with Earth's nearest neighbor the moon and then goes on to explore each planet in the solar system asteroids meteors comets and the sun Following this the reader is whisked away into deep space to explore celestial bodies including stars that are known and many sights less familiar The final chapter includes a detailed atlas of deep sky objects visible through binoculars The appendices include guidance on how to buy care for and maintain astronomical binoculars tips and hints on using them and detailed information on several home made binocular mounts

**Exploring the Ocean Worlds of Our Solar System** Bernard Henin, 2024-08-22 In the past 25 years planetary science has undergone a revolution with the discovery of vast oceans of liquid water within the icy moons of our Solar System These subsurface oceans are concealed beneath thick ice layers We refer to these moons and similar ocean bearing planetary objects as ocean worlds In this 2nd edition we delve into and compare the latest scientific discoveries on 22 confirmed or potential ocean worlds ranging from the giant asteroid Ceres and the icy moons Europa and Enceladus to the distant dwarf planets of the outer Solar System such as Pluto Sedna and Eris Along the way we explore the contributions of multiple spacecraft such as the Pioneers the Voyagers Galileo Cassini Huygens and many others which have provided much of our current knowledge about these worlds as well as the latest scientific research on this subject This book also explores the potential for life on each of the confirmed ocean worlds evaluating their habitability Ultimately these might hold the key to answering fundamental questions about life How did life begin Is there life beyond Earth Where do we come from With contributions from leading planetary scientists at NASA ESA and other institutions this book aims to be the definitive reference for anyone interested in this captivating subject

*I Know the Answers* Simon Khachatryan, 2023-08-23 Comparing human lifespans to the age of our planet we consider the Earth as some kind of constant But should we According to the Old Testament and many ancient manuscripts there were events and mythical characters that modern science can neither prove nor disprove In fact getting a scientific explanation of an event is much harder than witnessing it That is why

science is way behind religion and our only hope for the future is to bridge the gap between them In this book the author explores why every generation struggles with reconciling the differences between science and religion He seeks to answer questions such as Has the Earth always rotated in the same direction Were there any shifts of the poles on Earth Was the sea level always the same Was the moon always there While there are widely accepted theories on the origin of continents oceans mountains lakes and volcanoes they all have their shortcomings In this book you ll discover a revolutionary approach that answers how our universe appeared and where we are going Small Bodies Of The Solar System: A Guided Tour For Non-scientists Hans Rickman,2021-08-18

Amongst the famous planetary inhabitants of our solar system there is an entire ecosystem of smaller less recognised bodies in the form of comets and minor planets These native residents derived from the building blocks of planets contain valuable information By studying them in detail we may learn about the processes that occurred from the Sun s birth to the emergence of the solar system as we know it today Small Bodies of the Solar System paints a detailed picture of the space missions laboratory experiments and computer experiments behind our current understanding of the comets minor planets meteors and meteorites With a rich selection of pictures this book combines personal reflection and poetic imagery with a mathematical and physical overview to introduce the reader to these small wonders of our universe *Perspectives on Wearable Enhanced Learning (WELL)* Ilona Buchem,Ralf Klammer,Fridolin

Wild,2019-11-01 Wearable technologies such as smart glasses smart watches smart objects or smart garments are potential game changers breaking ground and offering new opportunities for learning These devices are body worn equipped with sensors and integrate ergonomically into everyday activities With wearable technologies forging new human computer relations it is essential to look beyond the current perspective of how technologies may be used to enhance learning This edited volume Perspectives on Wearable Enhanced Learning aims to take a multidisciplinary view on wearable enhanced learning and provide a comprehensive overview of current trends research and practice in diverse learning contexts including school and work based learning higher education professional development vocational training health and healthy aging programs smart and open learning and work This volume features current state of the art wearable enhanced learning and explores how these technologies have begun to mark the transition from the desktop through the mobile to the age of wearable ubiquitous technology enhanced learning
