How to Interpret Family History and Ancestry DNA Test Results for Beginners Anne Hart M. a., Anne Hart, 2004

How many DNA testing companies will show you how to interpret DNA test results for family history or direct you to instructional materials after you have had your DNA tested Choose a company based on previous customer satisfaction and whether the company gives you choices of how many markers you want various ethnic and geographic databases and surname projects based on DNA driven genealogy Before you select a company to test your DNA find out how many genetic markers will be tested For the maternal line 400 base pairs of sequences are the minimum For the paternal line men only 37 markers are great but 25 markers also should be useful Some companies offer a 12 marker test for surname genealogy groups at a special price Find out how long the turnaround time is for waiting to receive your results What is the reputation of the company Do they have a contract with a university lab or a private lab Who does the testing and who is the chief geneticist at their laboratory What research articles if any has that scientist written or what research studies on DNA have been performed by the person in charge of the DNA testing at the laboratory Who owns the DNA business that contracts with the lab How involved in genealogy related DNA projects and databases or services is the owner **Medical Research**

Infant Gender Selection & Personalized Medicine Anne Hart, 2005-08-04

Personalized medicine is what this book is about tailoring your lifestyle food medicines treatments and reproductive choices to your genetic signature According to Dr Andrew Y Silverman MD PhD The desire to influence the sex of the next child is probably as old as recorded history Gender selection is possible because of the way in which sex is determined by our chromosomes Dr Ericsson devised patented methods by which X and Y sperm can be separated through filtering processes Sperm are layered over a column of human serum albumin and they swim down the gradient where they are collected in the bottom layer The fraction of sperm that contains the male Y bearing sperm is used for insemination if a boy is desired It is effective 70-75% of the time The fraction of sperm that contains the female X bearing sperm is used for insemination if a girl is desired It is effective 70-72% of the time Use personalized medicine more effectively Empower consumers by interpreting DNA testing and learning more about infant gender choice by genetics
