Discover a groundbreaking new way of thinking about life, society, and the future of our species that bridges science and human history. Could humans unknowingly be a part of a larger superorganism, one with its own motivations and goals, one that is alive and conscious and has the power to shape the future of our species? This is the fascinating theory from author and futurist Byron Reese, who calls this human superorganism *Agora*. In *We Are Agora*, Reese starts by asking the question: What is life, and how did it form? From there, he looks at how multicellular life came about, how consciousness emerged, and how other superorganisms in nature have formed. Then he poses eight big questions based on the *Agora* theory, including: If ants have colonies, bees have hives, and we have our bodies, how does *Agora* manifest itself? Does it have a body? Can *Agora* explain things that happen that are both under our control and near universally undesirable, such as war? How can *Agora* theory explain long-term progress we've made in the world? In this unique and ambitious work that spans all of human history and looks boldly into its future, Reese melds science and history to look at the human species from a fresh new perspective. Told with his characteristic wit and compulsive readability, *We Are Agora* will give readers a better understanding of where we've been, where we're going, and how our fates are intertwined. **Educational Media and Technology Yearbook**
