Deep Blue Monty Newborn, 2013-03-20 is a competitor of the Deep Blue team. I had mixed emotions as I watched their chess playing machine defeat World Chess Champion Garry Kasparov during their 1997 Rematch. On the one hand it meant that our MIT program Socrates would not be the first program to defeat a human World Chess Champion. On the other hand I felt great admiration for the monumental engineering accomplishment that Deep Blue's victory represented and proud for the small part that my own team had played in advancing computer chess research. After over 50 years of concerted effort to produce a chess playing machine capable of beating the best human, Deep Blue finally attained the goal that so many computer scientists had sought. In this entertaining and informative book, Monty Newborn chronicles the story of Deep Blue from its origins as Chiptest at Carnegie Mellon University to its winning the Rematch as a top IBM research project. You do not have to be a chess player or a computer scientist to enjoy this marvelous tale of man and machine. Monty paints the characters of this drama in vivid colors from the technical geniuses CB Hsu, Murray Campbell, and Thomas Anantharaman to the visionary manager CJ Tan. As only an insider can, Monty recreates the excitement of the event, including the IBM marketing hype and the marvelous compendium of editorial cartoons.

Ananda John Dudley Ball, 1982. Whenever the subject of communities and communal living comes up, a variety of doubts and suspicions is usually aroused. The possible brainwashing of impressionable young people is frequently mentioned. Although the idea itself is centuries old, it has yet to be accepted as an approved method of living, even in this so-called New Age. Of the many hundreds that have been started, very few have proven successful. The fact that Ananda has done so remarkably well against terrifying odds and that at every time of crisis help always seems to come in some extraordinary way invites attention. During his lifetime, which ended in 1952, Yogananda called for the founding of spiritual communities dedicated to world brotherhood and to simple living and high thinking. Ananda is the first response to this directive. Its remarkable history and its present expanding horizons are the subject of this work.

Deep Blue Monroe Newborn, Monty Newborn, 2003. This book offers a detailed account of IBM's Deep Blue chess program, the people who created it, and its historic battles with World Chess Champion Garry Kasparov. The text examines the progress made by the creators of Deep Blue, beginning with the 1989 two-game match against Kasparov. The heroes are IBM researchers Feng Hsiung Hsu, Murray Campbell, and Joe Hoane, along with team leader Chung Jen Tan and International Grandmaster Joel Benjamin. The text chronicles one of the great technology achievements of the 20th Century. It establishes

the point in history when mankind's exciting new tool the computer came of age and competed with its human creators in the ultimate intellectual competition a game of chess This book will serve as the premier story documenting that achievement and a milestone in the development of artificial intelligence *Mastering Complex Endgames* Daniel Naroditsky, 2014-03-11

Young Daniel Naroditsky 1995 has picked the most instructive examples of endgames in which you have to use ideas and plans in order to outplay your opponent This is not an encyclopaedia nor a manual on endings which are usually helpful but boring but a compendium of lively lessons and exercises The positions that International Master Naroditsky uses should not be memorized but understood and his acclaimed didactic skills will take your endgame technique to the next level Never before have the ideas that decide endings been explained so clearly With exercise at the end of each chapter **Expressing the Self** Minyao Huang, Katarzyna Jaszczolt, 2018 This book addresses different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families including Amharic English French Japanese Korean Mandarin Newari Sino-Tibetan Polish Tariana Arawak and Thai In the domain of speaking about oneself languages use a myriad of expressions that cut across grammatical and semantic categories as well as a wide variety of constructions Languages of Southeast and East Asia famously employ a great number of terms for first person reference to signal honorification The number and mixed properties of these terms make them debatable candidates for pronounhood with many grammar-driven classifications opting to classify them with nouns Some languages make use of egophors or logophors and many exhibit an interaction between expressing the self and expressing evidentiality qua the epistemic status of information held from the ego perspective The volume's focus on expressing the self however is not directly motivated by an interest in the grammar or lexicon but instead stems from philosophical discussions on the special status of thoughts about oneself known as *de se* thoughts It is this interdisciplinary understanding of expressing the self that underlies this volume comprising philosophy of mind at one end of the spectrum and cross-cultural pragmatics of self-expression at the other This unprecedented juxtaposition results in a novel method of approaching *de se* and *de se* expressions in which research methods from linguistics and philosophy inform each other The importance of this interdisciplinary perspective on expressing the self cannot be overemphasized Crucially the volume also demonstrates that linguistic research on first person reference makes a valuable contribution to research on the self tout court by exploring the ways in which the self is expressed and thereby adding to the insights gained through philosophy psychology and cognitive science Naked in the Wind Brinda Charry, 2007 Who Knows What I Am Who Cares I Don't Ever Step Into A Church And If I Go To The Temple It's Only To Look At The Bangle Stalls On The Big Festival Days Without Warning A Family On Campbell Street Wakes Up To The Return Of A Long Lost Member Vasu After Nearly Fifteen Years Of Unexplained Absence He Turns Up Suddenly Accompanied By Anand His Mysterious Caretaker They Are Met By Vasu's Family Including His Long Suffering Wife Shanti And Their Children Priya And Vivek Their Beautiful Strong Willed Yet Insecure Neighbour Kathy And The Feisty Flirtatious
