Graphic Texts Eva Teubal,Ainat Guberman,2014-11-04 The message of the book is straightforward and easy to apply it derives from the interweaving of long years of field work with a solid theoretical background The practice advocated presents children with the opportunity to confront contents and situations which are only too often considered inaccessible for them The abundant examples presented show that when provided with an adequate toolkit composed of graphic texts children are inherently motivated by the challenges surrounding them and can make the most out of them as valuable learning opportunities Drawings icons photographs maps and calendars are incorporated into the tool kit while they are being used in circumstances in which they are required children appropriate them while exposed to their use and experience their affordances Children realize how the graphic texts empower their performance The fact that this toolkit is multimodal involves several sensory modalities implies that those for whom language is not the most readily available means of communication and processing are not discriminated against on the one hand it facilitates conceptualization and its expression by alternative means and on the other it supports both the comprehension and production of verbal language

Choreomania Kéline Gotman,2018 When political protest is read as epidemic madness religious ecstasy as nervous disease and angular dance moves as dark and uncouth the disorder being described is choreomania At once a catchall term to denote spontaneous gestures and the unruly movements of crowds choreomania emerged in the nineteenth century at a time of heightened class conflict nationalist policy and colonial rule In this book author Kéline Gotman examines these choreographies of unrest rethinking the modern formation of the choreomania concept as it moved across scientific and social scientific disciplines Reading archives describing dramatic misformations of bodies and body politics she shows how prejudices against expressivity unravel in turn revealing widespread anxieties about demonstrative agitation This history of the fitful body complements stories of nineteenth century discipline and regimentation As she notes constraints on movement imply constraints on political power and agency In each chapter Gotman confronts the many ways choreomania works as an extension of discourses shaping colonialist orientalism which alternately depict riotous bodies as dangerously infected others and as curious bacchanalian remains Through her research Gotman also shows how beneath the radar of this colonial discourse men and women gathered together to repossess on their terms the gestures of social revolt

Cultural Studies Review Chris Healy and Stephen Muecke (eds),2008 The October 2008 Cultural Studies Review is a special issue focusing on cultures of panic particularly recent examples of moral panic

arising from issues of race gender and sexuality The diverse essays deal with men of Middle Eastern appearance the trial of Private Kovko the aftermath of Hurricane Katrina the use of Ritalin concerns around children and sexuality in Australia and arts funding in the United States during the culture wars The moral panic has centrally to do with the behaviour of crowds particularly the virtual crowds created by the mass media It s a mechanism of expulsion and thus at the same time of group solidarity It s also a particularly powerful genre of the tabloid media in its identification and shaming of deviant social groups it rigidly defines and reinforces moral norms and is complicit with political strategies of consolidation and othering which create and depend on a sense of horror at refugees who wilfully throw their children overboard or push in to the front of the queue at paedophiles grooming children over the internet at drug crazed criminals and bingeing teenagers The challenge is to move beyond the realisation that moral panics are not rationally constructed to an analysis of the passional bases of the social order and to an understanding of how our politics might deal with this without itself falling into the contagion of panic

The diverse collection of essays gathered together in this edition takes up that challenge **Performing Queer Latinidad**

Japanese Frames of Mind Hidetada Shimizu,Robert A. LeVine,2001 Japanese Frames of Mind addresses two main questions in light of a collection of research conducted by both Japanese and American researchers at Harvard University What challenge does Japanese psychology offer to Western psychology Will the presumed universals of human nature discovered by Western psychology be reduced to a set of local psychology among many in a world of unpredicted variations The chapters provide a wealth of new data and perspectives related to aspects of Japanese child development moral reasoning and narratives schooling and family socialization and adolescent experiences By placing the Japanese evidence within the context of Western psychological theory and research the book calls for a systematic reexamination of Western psychology as one psychology among many other ethnopsychologies Written in mostly non technical language this book will appeal to developmental and cultural psychologists anthropologists interested in psychological anthropology educators and anyone interested in Japanese and Asian studies

Television History, the Peabody Archive, and Cultural Memory Ethan Thompson,Jeffrey P. Jones,Lucas Hatlen,2019 Television History The Peabody Archive and Cultural

Memory is the product of a multiyear collaboration between the Peabody Awards program and over a dozen media scholars with the intent to uncover explore and analyze historical television programming contained in the Peabody Awards archives at the University of Georgia It is an intentional effort to look both wider and deeper than the well known canon of U S broadcast history that dominates popular memory of the relationship of television to American society The Peabody Archive is especially suited to this project because it is an archive of programming produced and submitted not just by the big networks in New York or Los Angeles but by stations and media producers across the nation and more recently around the world This project asks how might these programs change our understanding of television s past and impact the ways we think about television s present and future What new questions can we ask and what new approaches should we take as a result of seeing and experiencing this programming The contributions in this volume offer a dramatic range of approaches for how scholars can productively engage the archive s media and physical holdings to examine and reconsider television history
