European explorers reached the southern shores of North America in the early seventeenth century they faced a solid forest that stretched all the way from the Atlantic coast to eastern Texas and Oklahoma The ways in which they and their descendants used and abused the forest over the next nearly four hundred years form the subject of The Southern Forest In chapters on the explorers pioneers lumbermen boatbuilders and foresters Laurence Walker chronicles the constant demands that people have made on forest resources in the South He shows how the land s very abundance became its greatest liability as people overhunted the animals clearcut the forests and wore out the soil with unwise farming practices all in a mistaken belief that the forest s bounty including new ground to be broken was inexhaustible With the advent of professional forestry in the twentieth century however the southern forest has made a comeback A professional forester himself Walker speaks from experience of the difficulties that foresters face in balancing competing interests in the forest How for example does one reconcile the country s growing demand for paper products with the insistence of environmental groups that no trees be cut Should national forests be strictly recreational areas or can they support some industrial logging How do foresters avoid using chemical pesticides when the public protests such natural management practices as prescribed burning and tree cutting This personal view of the southern forest adds a new dimension to the study of southern history and culture The primeval southern forest is gone but with careful husbandry on the part of all users the regenerated southern forest may indeed prove to be the inexhaustible resource of which our ancestors dreamed

Cities Going Green Roger L. Kemp, Carl J. Stephani, 2014-01-10 Over the past several decades numerous planning movements have taken root within the United States With names like Urban Renewal Garden Cities Healthy Cities Smart Growth Eco Cities and Sustainability these programs promote ways to create protect preserve enhance and restore the quality of life in cities towns and suburbs especially in regards to the natural environment This guide to the best practices of these programs introduces the rapidly evolving field before presenting more than 40 case studies of communities that are effectively going green An assessment of the future of these towns and cities and resources for citizens and officials seeking additional information conclude the work By compiling these success stories this handbook makes an excellent resource for anyone seeking to facilitate the restoration of the natural environment within their community

Ethnobotany Gary J. Martin, 2014-07-29 Ethnoecology has blossomed in recent years into an important science because of the realization that the vast body of knowledge contained in both indigenous and folk cultures is being rapidly lost as natural ecosystems and cultures are being destroyed by the encroachment of development Ethnobotany and ethnozoology both began largely with direct observations about the ways in which people used plants and animals and consisted mainly of the compilation of lists Recently these subjects have adopted a much more scientific and quantitative methodology and have studied the ways in which people manage their environment and as a consequence have used a much more ecological approach This manual of ethnobotanical methodology will become an essential tool for all ethnobiologists and ethnoecologists It fills a significant gap in the literature and I only wish it had

been available some years previously so that I could have given it to many of my students I shall certainly recommend it to any future students who are interested in ethnoecology I particularly like the sympathetic approach to local peoples which pervades this book It is one which encourages the ethnobotanical work by both the local people themselves and by academically trained researchers A study of this book will avoid many of the arrogant approaches of the past and encourage a fair deal for any group which is being studied This manual promotes both the involvement of local people and the return to them of knowledge which has been studied by outsiders **Lemon-Aid New and Used Cars and Trucks 2007-2017** Phil Edmonston, 2017-03-11 Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car and truck book on the market Dr Phil along with George Iny and the Editors of the Automobile Protection Association pull no punches Rhodesia Telephone Directory Southern Rhodesia.
