Kahan, Dietram Scheufele, 2017 On topics from genetic engineering and mad cow disease to vaccination and climate change this Handbook draws on the insights of 57 leading science of science communication scholars who explore what social scientists know about how citizens come to understand and act on what is known by science **Property Rights in Outer Space** Matthew Johnson, 2024-05-28 This book explores the role of private mining rights in the utopian imaginary of space colonisation It presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier Written in an engaging style the book investigates a novel case study in the history of capitalism and the commons the emergence of a nascent space mining industry undergirded by a contentious legislative framework In 2015 the US passed laws that would recognise the claims of US corporations to own and sell space resources This unilateral act of pre emptive law making would appear to contravene the terms of the UN Outer Space Treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation Using this central dynamic between privately held mining rights and outer space as a global commons Matthew Johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity The anticipatory expansion of private property claims beyond the Earth both resonates with and problematises the terrain of political history such as the tensions between states and markets public law and private power the commons and exclusive property The emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of Earth and space This book is compelling

□, 2021-12-28 Malcolm Gladwell R E M Espresso Party **Notebooks, English Virtuosi, and Early Modern Science** Richard Yeo, 2014-03-01 In Notebooks English Virtuosi and Early Modern Science Richard Yeo interprets a relatively unexplored set of primary archival sources the notes and notebooks of some of the leading figures of the Scientific Revolution Notebooks were important to several key members of the Royal Society of London including Robert Boyle John Evelyn Robert Hooke John Locke and others who drew on Renaissance humanist techniques of excerpting from texts to build storehouses of proverbs maxims quotations and other material in personal notebooks or commonplace books Yeo shows that these men appreciated the value of their own notes both as powerful tools for personal recollection and following Francis Bacon as a system of precise record keeping from which they could retrieve large quantities of detailed information for collaboration The virtuosi of the seventeenth century were also able to reach beyond Bacon and the humanists drawing inspiration from the ancient Hippocratic medical tradition and its emphasis on the gradual accumulation of information over time By reflecting on

the interaction of memory notebooks and other records Yeo argues the English virtuosi shaped an ethos of long term empirical scientific inquiry Redesigning the Global Seed Commons Christine Frison,2018-11-08 There is much current controversy over whether the rights to seeds or plant genetic resources should be owned by the private sector or be common property This book addresses the legal and policy aspects of the multilateral seed management regime First it studies in detail the International Treaty on Plant Genetic Resources for Food and Agriculture the Treaty in order to understand and identify its dysfunctions Second it proposes solutions using recent developments of the theory of the commons to improve the collective seed management system of the Treaty a necessary condition for its member states to reach the overall food security and sustainable agriculture goals Redesigning the Global Seed Commons provides a significant contribution to the current political and academic debates on agrobiodiversity law and governance and on food security and food sovereignty by analyzing key issues under the Treaty that affect the design and implementation of regulatory instruments managing seeds as a commons It also examines the practical legal political and economic problems encountered in the attempt to implement these obligations in contemporary settings In particular it considers how to improve the Treaty implementation by proposing ways for Contracting Parties to better reach the Treaty s objectives taking a holistic view of the human seed ecosystem Following the tenth anniversary of the functioning the Treaty s multilateral system of access and benefit sharing which is currently under review by its Contracting Parties this book is well timed to examine recent developments in the field and guide the current review process to design a truly Global Seed Commons *Persisting Pandemics* Powel H.

Kazanjan,2024-11-15 *Persisting Pandemics* explores the history of syphilis and AIDS to provide insights into the limits of biomedicine and our experience with epidemics today Novel therapies developed for syphilis and AIDS became renowned in the medical field and the broader public sphere as exemplars of biomedical innovations Public health campaigns based on these spectacular biomedical advances however have repeatedly fallen short of their goals to eliminate syphilis and AIDS in the population The diseases epitomize the power of innovative biomedical therapies for the individual while unveiling limitations of scientific medicine in the domain of public health The need for a public health approach to address mistrust in science government indifference and racial inequalities is relevant for strategies to eliminate COVID 19 today *Persisting Pandemics* argues that campaigns to eliminate these diseases have not succeeded because they have not adequately addressed how diseases like AIDS syphilis and COVID spread unevenly in populations according to race ethnicity and geographic location Despite the expectation of public health officials that medical advances would render epidemics obsolete new diseases continue to emerge and spread regardless of efforts to eliminate them Medical doctor and historian Powel H Kazanjan concludes that narratives of syphilis AIDS and COVID unlike smallpox do not contain a discrete ending at least not within the timelines specified by their elimination campaigns Instead they will be a continued part of our existence
