European Energy Security and US-Russian Competition Ioanna Mavromati, 2025-10-31 This book argues that the influence of US Russian security competition on the energy policies of EU member states and on the development of a unified European energy security policy has been significantly underestimated While most previous studies have focused on internal EU dynamics and the role of Russian interests this work takes a broader perspective by examining how transatlantic rivalries have shaped European approaches to energy security By tracing the evolution of European energy security policy from the Cold War era through the present the book connects shifts in policy to the changing dynamics of US Soviet and later US Russian energy competition It demonstrates that after the Soviet Union's collapse the United States did not initially view European reliance on Russian energy as a threat However as US Russian competition intensified Washington increasingly framed Europe's dependence on Russian gas as a security risk and actively sought to block the expansion of Russian energy infrastructure into Europe The book also explores how despite the EU's early treaties being energy focused energy security only became a central foreign policy concern for the Union in the mid 2000s Ultimately the author argues that scholars of international relations must consider both great power dynamics and intra European factors to fully understand the development of European energy policy The book will be of interest to students and researchers in geopolitics international relations energy politics regional studies and European studies

Product Lifetimes And The Environment Conny A. Bakker,2017-11-15 Product lifetimes are critical for the circular economy resource efficiency waste reduction and low carbon strategies for sustainability and are therefore of interest to academics from many different disciplines as well as original equipment manufacturers OEMs and other stakeholders The challenges related to product lifetimes must be tackled from multiple perspectives making the sharing of knowledge and expertise from different disciplines particularly important This book presents papers from the second Product Lifetime and the Environment PLATE conference held in Delft the Netherlands in November 2017 The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other s knowledge and further advance the field The book includes the 88 full papers delivered at the conference grouped according to the following 7 conference themes design for product longevity product lifetime optimization cultural perspectives on the throwaway society circular economy and product lifetimes business opportunities economic implications and marketing strategies consumer influences on product lifetimes and policy regulation and legislation The book will be of interest to all those concerned with sustainable consumption circular economy and resource efficiency Alexander Von Humboldt and the United States Eleanor Jones Harvey,2020-04-14 The enduring influence of naturalist and explorer Alexander von Humboldt on American art culture and politics Alexander von Humboldt 1769 1859 was one of the most influential scientists and thinkers of his age A Prussian born geographer naturalist explorer and illustrator he was a prolific writer whose books graced the shelves of American artists scientists philosophers and politicians Humboldt visited the United States for six weeks in 1804 engaging in a lively exchange of ideas with such figures as Thomas Jefferson and the painter Charles Willson Peale It was perhaps the most consequential visit by a European traveler in the young nation s history one that helped to shape an emerging American identity grounded in the natural world In this beautifully illustrated book Eleanor Jones Harvey examines how Humboldt left a lasting impression on American visual arts sciences literature and politics She shows how he inspired a network of like minded individuals who would go on to embrace the spirit of exploration decry slavery advocate for the welfare of Native Americans and extol America s wilderness as a signature component of the nation s sense of self Harvey traces how Humboldt s ideas influenced the transcendentalists and the landscape painters of the Hudson River School and laid the foundations for the Smithsonian Institution the Sierra Club and the National Park Service Alexander von Humboldt and the United States looks at paintings sculptures maps and artifacts and features works by leading American artists such as Albert Bierstadt George Catlin Frederic Church and Samuel F B Morse Published in association with the Smithsonian American Art Museum Washington DC Exhibition Schedule Smithsonian American Art Museum Washington DC September

18 2020 January 3 2021 Washington at the Plow Bruce A. Ragsdale, 2021-10-12 George Washington spent most of his time farming often employing experimental methods Washington saw slave powered scientific agriculture as the key to the nation's prosperity Bruce Ragsdale argues that it was slave labor's inefficiency as much as its inhumanity that finally convinced Washington to emancipate the men and women bonded to him **Fighting the Great War at Sea** Norman Friedman, 2014-10-22 The overriding image of the First World War is the bloody stalemate of the Western Front but although much of the action did occur on land the overall shape of the war _ even the inevitability of British participation _ arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in the desperate German attempts to deal with the American industrial threat which ultimately levered the United States into the war and thus a consequence of British sea control rn This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing it describes rapid wartime changes not only in ship and weapon technology but also in the way naval warfare was envisaged and fought Combat produced many surprises some like the impact of the mine and torpedo are familiar but this book also brings to light many previously unexplored subjects like creative new tactical practices and improved command and control rn The contrast between expectation and reality had enormous consequences not only for the course of the war but also for the way navies developed afterwards This book melds strategic technical and tactical aspects to reveal the First World War from a fresh perspective but also demonstrates how its perceived lessons dominated the way navies prepared for the Second **Earned Citizenship** Michael J. Sullivan, 2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today But what do the state and citizens owe to unauthorized immigrants given non citizen contributions to their adopted country and connections to citizens who depend on them Earned Citizenship is a normative intervention in migration and citizenship studies that advances the proposition that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service to citizens in their adopted communities **Current Law Index**, 2000 Night Hunters William Pace Head, 2014-03-18 In Night Hunters air power historian William P Head provides the first detailed study of the development and deployment of the AC 130 gunship While other airframes and other types of close air support CAS and interdiction weapon systems preceded or flew with the AC 130s this four engine cargo airframe proved to be not only the longest serving fixed wing gunship but also the most effective by far During the Vietnam War the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features the difficult climate and the shifting diplomatic context One of the most important was the development of the AC 130 Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam era fixed wing gunship and the only one that continues to fly missions in the twenty first century In addition it employed many of the most advanced weapons sensors targeting devices and fire control systems of the 1970s or of any era By

recounting both the technical development and the combat operations of the plane and by looking at the proposed alternatives for its use in the War on Terror Night Hunters offers a clear view of the role of gunships and of close air support in US wars In today s never ending brushfire wars the AC 130s continue to uphold their reputation for excellence

Defence Planning and Uncertainty Stephan Frühling, 2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future
