Architecture And Movement The Dynamic Experience Of Buildings And Landscapes

Christos Kakalis, David Boyd

Architecture And Movement The Dynamic Experience Of Buildings And Landscapes:

Architecture and Movement Peter Blundell Jones, Mark Meagher, 2014-12-17 The experience of movement of moving through buildings cities landscapes and in everyday life is the only involvement most individuals have with the built environment on a daily basis User experience is so often neglected in architectural study and practice Architecture and Movement tackles this complex subject for the first time providing the wide range of perspectives needed to tackle this multi disciplinary topic Organised in four parts it documents the architect s planner s or designer s approach looking at how they have sought to deploy buildings as a promenade and how they have thought or written about it concentrates on the individual s experience and particularly on the primacy of walking which engages other senses besides the visual engages with society and social rituals and how mutually we define the spaces through which we move both by laying out routes and boundaries and by celebrating thresholds analyses how we deal with promenades which are not experienced directly but via other mediums such as computer models drawings film and television The wide selection of contributors include academics and practitioners and discuss cases from across the US UK Europe and Asia By mingling such disparate voices in a carefully curated selection of chapters the book enlarges the understanding of architects architectural students designers and planners alerting them to the many and complex issues involved in the experience of movement Architecture and

Movement Peter Blundell Jones, Mark Meagher, 2014-12-17 The experience of movement of moving through buildings cities landscapes and in everyday life is the only involvement most individuals have with the built environment on a daily basis User experience is so often neglected in architectural study and practice Architecture and Movement tackles this complex subject for the first time providing the wide range of perspectives needed to tackle this multi disciplinary topic Organised in four parts it documents the architect s planner s or designer s approach looking at how they have sought to deploy buildings as a promenade and how they have thought or written about it concentrates on the individual s experience and particularly on the primacy of walking which engages other senses besides the visual engages with society and social rituals and how mutually we define the spaces through which we move both by laying out routes and boundaries and by celebrating thresholds analyses how we deal with promenades which are not experienced directly but via other mediums such as computer models drawings film and television The wide selection of contributors include academics and practitioners and discuss cases from across the US UK Europe and Asia By mingling such disparate voices in a carefully curated selection of chapters the book enlarges the understanding of architects architectural students designers and planners alerting them to the many and complex issues involved in the experience of movement *XV International Scientific Conference "INTERAGROMASH*

2022" Alexey Beskopylny, Mark Shamtsyan, Viktor Artiukh, 2023-02-04 The book contains proceedings of the XV International Scientific Conference INTERAGROMASH 2022 Rostov on Don Russia The agro industrial complex is the most extensive and vital industry It is rapidly developing by introducing the latest technologies and automating various processes necessary for

the functioning of this area The book is dedicated to engineering technologies of precision farming and agricultural robotics It includes studies on natural resources variability sustainable soil management Agro Big Data Internet of Things software and mobile apps for precision agriculture smart weather for precision agriculture simulations models and decision support systems expert systems DGPS soil physical and chemical characteristic sensors machinery etc Different types of agricultural robots are presented in the book autonomous fruit picking robots farming bots that can seed and water plants test the soil and remove weeds completely autonomous robot for ecological and economical ultra high precision spraying and weeding harvesting robots with the special vision systems that can see fruits and understand whether they re ripe and ready to pick and others Also the book covers advances in agricultural biotechnology in such areas of research as crop production improvement practices genetic modification as well as microbial biotechnology in agriculture etc The book is aimed for scientists researchers and graduate students It is also useful for representatives of regional authorities as it gives an idea of existing high tech solutions for agriculture The book is written and edited by international researchers academics and experts in the corresponding research areas

Embodied Awareness of Space Christos Kakalis, David Boyd, 2025-01-16 This edited volume explores the notion of embodied experience through a diverse range of disciplines architecture music literature performance studies philosophy geopolitics In doing so it illuminates the need to redefine the role of the human body as one of the protagonists for raising awareness of space time issues through processing experimentation and application of histories and theories of embodied awareness of space Critically revisiting these spatio temporal dialogues this book suggests a method of linking theory history and practice past present and future The authors reinstate the significance of history and theory in creative thinking and test their applicability in a number of different areas theoretical and buildable architectural projects mapping and geography representation and performative arts This volume will appeal to students and scholars from architecture art cultural studies landscape studies media studies and other disciplines in the humanities and social sciences

Merleau-Ponty for Architects Jonathan Hale, 2016-07-01 The philosophy of Maurice Merleau Ponty 1908 1961 has influenced the design work of architects as diverse as Steven Holl and Peter Zumthor as well as informing renowned schools of architectural theory notably those around Dalibor Vesely at Cambridge Kenneth Frampton David Leatherbarrow and Alberto Perez Gomez in North America and Juhani Pallasmaa in Finland Merleau Ponty suggested that the value of people s experience of the world gained through their immediate bodily engagement with it remains greater than the value of understanding gleaned through abstract mathematical scientific or technological systems This book summarizes what Merleau Ponty s philosophy has to offer specifically for architects It locates architectural thinking in the context of his work placing it in relation to themes such as space movement materiality and creativity introduces key texts helps decode difficult terms and provides quick reference for further reading

The Mathematics of the Modernist Villa Michael J. Ostwald, Michael J. Dawes, 2018-04-12 This book presents the first detailed mathematical analysis of the social cognitive and

experiential properties of Modernist domestic architecture The Modern Movement in architecture which came to prominence during the first half of the twentieth century may have been famous for its functional forms and machine made aesthetic but it also sought to challenge the way people inhabit understand and experience space Ludwig Mies van der Rohe's buildings were not only minimalist and transparent they were designed to subvert traditional social hierarchies Frank Lloyd Wright's organic Modernism not only attempted to negotiate a more responsive relationship between nature and architecture but also shape the way people experience space Richard Neutra's Californian Modernism is traditionally celebrated for its sleek geometric forms but his intention was to use design to support a heightened understanding of context Glenn Murcutt's pristine pavilions seemingly the epitome of regional Modernism actually raise important questions about the socio spatial structure of architecture Rather than focussing on form or style in Modernism this book examines the spatial social and experiential properties of thirty seven designs by Wright Mies Neutra and Murcutt The computational and mathematical methods used for this purpose are drawn from space syntax isovist geometry and graph theory The specific issues that are examined include the sensory and emotional appeal of space and form shifting social and spatial structures in architectural planning wayfinding and visual understanding and the relationship between form and program **Precedented**

Environmental Futures Colin Porteous, 2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment **Drawing and Experiencing Architecture** Marianna

Charitonidou, 2022-11-07 How were the concepts of the observer and user in architecture and urban planning transformed throughout the 20th and 21st centuries Marianna Charitonidou explores how the mutations of the means of representation in architecture and urban planning relate to the significance of city's inhabitants She investigates Le Corbusier and Ludwig Mies van der Rohe's fascination with perspective Team Ten's interest in the humanisation of architecture and urbanism Constantinos Doxiadis and Adriano Olivetti's role in reshaping the relationship between politics and urban planning during the postwar years Giancarlo De Carlo's architecture of participation Aldo Rossi's design methods Denise Scott Brown's active socioplactics and Bernard Tschumi's conception praxis Museum Configurations John Peponis, 2023-12-19 Museum

Configurations demonstrates how museum space functions cognitively and communicatively and questions whether it can be designed to provide a rich embodied experience situating displays and their public in felicitous dialogue Including contributions from authors working in the disciplines of architecture psychology museum studies history and the visual arts this volume addresses an interdisciplinary audience The analysis of a wealth of examples shows how the voices of architects

curators and exhibition designers enter into dialogue and invite visitors to make their own connections between physical cognitive and affective space Considering how the layout of museums facilitates movement and orientation so that visitors may devote their attention to displays the book questions what kinds of visual attention characterizes museum experiences and how the design of museum space can support them In the context of an often dematerialized atomized and dissipating contemporary culture the book proposes that museums can function as shared space that supports enjoyment and learning without being overly didactic *Museum Configurations* focuses upon the functions and aims of the design of space This makes the book particularly interesting to academics and students working in exhibition design and museum architecture as well as to exhibition designers curators and architects

Gated Luxury Condominiums in India Dhara Patel, 2024-06-17 *Gated Luxury Condominiums in India* A Socio Spatial Arena for New Cosmopolitans critically examines gated luxury condominiums in contemporary India exploring their role in shaping elite power and identity within the framework of neoliberalism It delves into the spatial structure perception and post occupancy experience of these enclaves offering valuable insights into India's urban development This book convincingly elucidates the complex socio spatial transformations underway in India inviting readers to understand the depth and breadth of these changes particularly within the rapidly expanding middle and upper middle classes It adopts a robust multi disciplinary approach combining methodologies such as spatial ethnography threshold mapping qualitative interviews and discourse analysis Focused on the architectural typology of luxury condominiums the study serves as a lens for broader social transformations grounded in case studies from Mumbai and Pune Through a meticulous dissection of the lived experiences of various categories of users owners visitors and service staff the book unveils the complex socio spatial hierarchies perpetuated within these enclaves Drawing on theories of cosmopolitanism and postcolonial critiques the monograph makes a significant scholarly contribution to the disciplines of architecture and the built environment It fills a gap in the existing literature on modern domesticity in India offering original research that highlights how architecture is instrumental in socially divisive practices of elite formation It will appeal to scholars researchers and students across disciplines like architecture landscape design spatial sociology urban studies and area studies focusing on India and South Asia It is particularly compelling for those interested in the sociocultural dynamics of the middle class encompassing themes such as domesticity material culture and spatial politics within the context of Indian condominiums

Eventually, you will certainly discover a new experience and completion by spending more cash. still when? pull off you take that you require to get those all needs following having significantly cash?
