their journey get inspired to dream and make your own story *Urban Infrastructure* Remo Dalla Longa, 2023-03-01 The
book deals with the concept of urban infrastructure and the strong evolution of globalization in particular the driving force
taken by global cities Urban infrastructure is a constituent part of the global cities both have a synergistic evolution The
main reference is to western global cities in the intertwining of financialization settling and brownfield which is a little
different from the urbanization of other global cities of other non developed countries or emerging countries There is
therefore a significant link between globalization and urban infrastructure The occurrence of slowbalization can have
consequences on urban areas infrastructures and more generally on the different dichotomy between global city and nation
With the pandemic infectious and the post COVID there is already a different configuration between the global city and the
rest of the national territory A driving element of the urban infrastructure and the global city has been the financialization
and identification of assets within global cities Urban infrastructure as an asset has grown considerably in the last two
decades in the wake of what has already been highlighted previously for real estate There are contiguous issues that affect
the concept of urban infrastructures and they are the enormous growth of finance and the landings of this in the great cities
of the world with investments that first involved Real Estate and then urban infrastructures There has also been a
technological revolution that has merged the ubiquitous technological infrastructure with other more traditional components
of the infrastructure even apparently recent themes such as smart cities come from this evolutionary trend and merge with
urban infrastructures The theme of smart cities if properly interpreted gives strength to the concept of urban infrastructure
