Christian S. Jensen,Markus Schneider,Bernhard Seeger,Vassilis J. Tsotras,2003-05-15 The Seventh International Symposium on Spatial and Temporal Databases SSTD 2001 held in Redondo Beach CA USA July 12 15 2001 brought together leading researchers and developers in the area of spatial temporal and spatio temporal databases to discuss the state of the art in spatial and temporal data management and applications and to understand the challenges and search directions in the advancing area of data management for moving objects The symposium served as a forum for disseminating research in spatial and temporal data management and for maximizing the interchange of knowledge among researchers from the established spatial and temporal database communities The exchange of research ideas and results not only contributes to the academic arena but also benefits the user and commercial communities SSTD 2001 was the seventh in the series of symposia that started in Santa Barbara a dozen years ago and has since been held every two years in Zurich Singapore Portland Maine Berlin and Hong Kong By 1999 the series had become well established as the premier international forum devoted solely to spatial database management and it was decided to extend the scope of the series to also cover temporal database management This extended scope was chosen due in part to the increasing importance of research that considers spatial and temporal aspects jointly *Sustainability Impact Assessment of Land Use Changes* Katharina Helming,Marta Pérez-Soba,Paul Tabbush,2008-06-11 There are many reasons why strategic intelligence is required to support policy decisions These primarily stem from the nature of today's knowledge society with two contrasting trends On the one hand there is a trend of increasing human intelligence in the economic social and political systems On the other hand there is a trend towards dissolving certainties about the problems and solutions of today's society Clearly more information does not necessarily imply more certainties on how to act What is more the same facts are often interpreted in markedly different ways the same policy relevant information can and often does result in conflicting framing of a problem by different stakeholders This is mainly due to competing assumptions rather than because of inconsistent facts Therefore it is not surprising that policy makers are calling for strategic intelligence to support their understanding of today's challenges including the relevant aspects of science and technology their impact and their possible future developments Over the last 15 years Europe has rapidly adopted the practice of developing and using Impact Assessment IA tools to support decision making Formal procedures and guidance for IA are well established within the European Commission and in most EU Member States The adoption of IA procedures alone however does not guarantee that every policy domain is actually using the full potential of these assessment tools in the preparation of policies and legislation **Evolution and Dynamics of the Australian Plate**
