Architecture Model Time Lapse:

Architecture's Model Environments Lisa Moffitt, 2023-02-20 Seen through the distilling lens of the architectural model Architecture's Model Environments is a novel and far reaching exploration of the many dialogues buildings have with their environmental surroundings Expanding on histories of building technology the book sheds new light on how physical models conventionally understood as engineering experimentation devices enable architectural design speculation The book begins with a catalogue of ten original model prototypes of wind tunnels water tables and filling boxes and is the first of its kind to establish an architectural approach to fabricating such environmental models Subsequent chapters feature three precedent models that have been largely overlooked within the wider oeuvres of their authors French polymath tienne Jules Marey's 1900 2 wind tunnels Hungarian American architects Victor and Alad r Olgyay's 1955 63 thermoheliodon and Scottish chemist and building ventilation expert David Boswell The Ventilator Reid's 1844 test tube convection experiments Moving between historic moments and the present day between case studies and original prototypes the book reveals the potent ability for models as both physical artefacts and mental ideals to reflect prevailing cultural views about the world and to even reshape those views Fundamentally Architecture's Model Environments illustrates how environmental models reveal design insights across scales from the seam that leaks to the body that feels to the building that mediates to the world that immerses

Rhizosphere Functioning and Structural Development as Complex Interplay between Plants, Microorganisms and Soil Minerals Carsten W. Mueller, Andrea Carminati, Christina Kaiser, Jens-Arne Subke, Caroline Gutjahr, 2019-12-19 The rhizosphere the soil volume which is directly affected by root activity is an important hot spot for a multitude of biotic and abiotic processes Carbon transfer from plants to microorganisms and to soil takes place in these small volumes around living roots creating chemical gradients and zones of microbial activity over distinct temporal and spatial scales Hydraulic and biogeochemical properties of the rhizosphere and the formation of complex three dimensional structures such as micro and macroaggregates in turn result from complex feedbacks between physical chemical and biological processes The aim of this Research Topic is to advance our understanding of rhizosphere interactions by collating 16 original contributions across disciplines including original research reviews and specific methods on the processes taking place in the rhizosphere to shed new light on one of the most important interfaces for the diversity of life on earth
