

A collection of vintage bookbinding tools is displayed on a dark, textured surface. The tools include a large hammer with a wooden handle, a smaller hammer, a brush with a wooden handle and dark bristles, a metal tool with a wooden handle, and various other metal instruments. The tools are arranged in a grid-like fashion, with some tools having wooden handles and others being entirely metal. The lighting is dramatic, highlighting the textures of the wood and metal.

R R Bowker Publishing,Bowker,1999-12 *Conceptual Model-Based Problem Solving* Yan Ping Xin,2013-02-11 Are you
having trouble in finding Tier II intervention materials for elementary students who are struggling in math Are you hungry
for effective instructional strategies that will address students conceptual gap in additive and multiplicative math problem
solving Are you searching for a powerful and generalizable problem solving approach that will help those who are left behind
in meeting the Common Core State Standards for Mathematics CCSSM If so this book is the answer for you The conceptual
model based problem solving COMPS program emphasizes mathematical modeling and algebraic representation of
mathematical relations in equations which are in line with the new Common Core Through building most fundamental
concepts pertinent to additive and multiplicative reasoning and making the connection between concrete and abstract
modeling students were prepared to go above and beyond concrete level of operation and be able to use mathematical
models to solve more complex real world problems As the connection is made between the concrete model or students
existing knowledge scheme and the symbolic mathematical algorithm the abstract mathematical models are no longer alien
to the students As Ms Karen Combs Director of Elementary Education of Lafayette School Corporation in Indiana testified It
really worked with our kids One hallmark of mathematical understanding is the ability to justify why a particular
mathematical statement is true or where a mathematical rule comes from <http://illustrativemathematics.org/standards>
Through making connections between mathematical ideas the COMPS program makes explicit the reasoning behind math
which has the potential to promote a powerful transfer of knowledge by applying the learned conception to solve other
problems in new contexts Dr Yan Ping Xin s book contains essential tools for teachers to help students with learning
disabilities or difficulties close the gap in mathematics wordproblem solving I have witnessed many struggling students use
these strategies to solve word problems and gain confidence as learners of mathematics This book is a valuable resource for
