MATHEMATICS (2020 RRB) YCT EXPERT TEAM, RRB 2020 GENERAL AND ADVANCE MATHEMATICS SOLVED PAPERS The Biology of Cancer P.R. Burch, 2012-12-06 Of all the diseases that afflict mankind those described as cancer evoke the strongest emotions Cancer connotes pain protracted suffering hideous growth and death It is widely and justifiably feared In medically advanced countries malignant neoplasms the official term for cancers account for a substantial proportion of all deaths Out of a total of 575194 deaths in Eng land and Wales during the year 1970 some 117076 or 20 4 per cent were attributed to neoplasms of one kind or another Registrar General 1972 Diseases of the circulatory system mainly

arteriosclerotic and degenerative heart disease claimed many more victims being responsible for some 50 6 per cent of all deaths but our psyche evidently responds more to the manner of the disease than to the number of deaths it causes Many of us will have witnessed the deterioration of a close friend or relative suffering from an inoperable cancer such an experience induces a sense of hopelessness and helplessness The feelings of sorrow and distress can be a powerful stimulus to action and they often result in dedicated and tireless research efforts At the same time the very strength and depth of the commitment may sometimes be incompatible with the detachment that is needed for objective analysis and a wise strategy Not too rigorously we reason that if only we can discover the causes of cancer then our problems will be solved and our agonies relieved Remove the cause prevent the cancer The logic exerts an irresistible appeal
