

DESIGNING FOR ALL AGES & ABILITIES

Every design must meet the needs of a diverse range of potential bike riders. Across North America, however, many existing bike facility designs provide enough comfort for only the healthiest people living and exclude many who might otherwise ride.

IN ALL AGES & ABILITIES people deserve to use their local communities and provide ideas for alternative transportation. A good design is one that is safe, healthy, and accessible to all. It is a design that is not just for the young and fit, but for all ages and abilities. It is a design that is not just for the young and fit, but for all ages and abilities. Water in Road Structures Andrew Dawson, 2008-10-21 Background This book is the most obvious outcome of the COST 351 WATMOVE project see www.watmove.org For most readers these terms probably mean little so some explanation is called for In 2001 2002 a small group led by Kent Gustafson of the Swedish Road and Traffic Institute VTI made a proposal to the European programme on Cooperation in Science and Technology COST They proposed that a pan European team be set up to study the issue of Water Movements in Road Pavements and Embankments acronym WATMOVE The COST organisation agreed the proposal and the study formally began in December 2003 with the support of COST Due to ill health Kent was not able to lead the project and I was asked by the Management Committee to chair the project team Scope of the Book This book is NOT about Water and Roads nor on Water on Roads There are other books which deal with surface water drainage in great detail and there are other source materials that deal with the impact of roads on water in the general environment To cover every aspect of the interaction between water and highways would have required a much greater effort and a much thicker book So this book seeks to limit itself to i Water inside the road construction and the underlying subgrade soils and rocks 1 ii Water from the

surface down to the phreatic surface and iii Water in the road and ground between the fence lines of the highway
