Developments in Chaos and Complexity Research Nicoletta Sala, 2008 This book presents the latest leading edge international research on artificial life cellular automata chaos theory cognition complexity theory synchronisation fractals genetic algorithms information systems metaphors neural networks non linear dynamics parallel computation and synergetics The unifying feature of this research is the tie to chaos and complexity *Creativity* Rob Pope, 2005 Seeking throughout to bridge the gap between the creative and the critical and to span disciplinary boundaries this book offers a significant intervention in the theory of creativity and the practice of criticism **Exploring Greek Myth** Matthew Clark, 2012-03-02 Exploring Greek Myth offers an extensive discussion of variant forms of myths and lesser known stories including important local myths and local versions of PanHellenic myths Clark also discusses approaches to understanding myths allowing students to gain an appreciation of the variety in one volume Guides students from an introductory understanding of myths to a wide ranging exploration of current scholarly approaches on mythology as a social practice and as an expression of thought Written in an informal conversational style appealing to students by an experienced lecturer in the field Offers extensive discussion of variant forms of myths and many lesser known but deserving stories Investigates a variety of approaches to the study of myth including the sources of our knowledge of Greek myth myth and ritual in ancient Greek society comparative myth myth and gender hero cult psychological interpretation of myth and myth and philosophy Includes suggestions in each chapter for essays and research projects as well as extensive lists of books and articles for further reading The author draws on the work of many leading scholars in the field in his exploration of topics throughout the text Exercise Exchange , 1963 **Lost Causes** Jason B. Jones, 2006 What if we didn't always historicize when we read Victorian fiction Lost Causes shows that Victorian writers frequently appear to have a more supple and interesting understanding of the relationship between history causality and narrative than the one typically offered by readers who are burdened by the new historicism As a return to these writers emphasizes the press of modern historicism deforms Victorian novels encouraging us to read deviations from strict historical accuracy as ideological bad faith By contrast Jason B Jones argues through readings of works ranging from The French Revolution to Middlemarch that literature's engagement with history has to be read otherwise Perhaps perversely Lost Causes suggests simultaneously that psychoanalysis speaks pressingly to the vexed relationship between history and narrative and that the theory is neither a nor anti historical Through his readings of Victorian fiction addressing the recent past Jones finds in psychoanalysis not a set of truths but rather a method for rhetorical reading ultimately revealing how its troubled account of psychic causality can help us follow literary language's representation of the real Victorian narratives of the recent past and psychoanalytic interpretation share a fascination with effects that persist despite baffling inexplicable or absent causes In chapters focusing on Thomas Carlyle Charles Dickens Charlotte Bront and George Eliot Lost Causes demonstrates that history can carry an ontological as well as

an epistemological charge one that suggests a condition of being in the world as well as a way of knowing the world as it really is From this point of view Victorian fiction that addresses the recent past is not a failed realism as it is so frequently claimed but rather an exploration of possibility in history
