Reframing Business Richard Normann, 2001-07-10 In 1983 Richard Normann published the world's first book presenting an integrated framework on the management of service producing companies. Now he provides a new approach to strategy, an original way to think about organisations and create a different future. In this demanding but rewarding book he shows that providing organisations are prepared to rethink the way they do business, they can occupy the competitive high ground of the future. To do this they must transform concepts and frameworks into action. Provides new business models. Shows companies how to reframe their business and take advantage of the opportunities created in the space of unbundling and rebundling.

Customize the Brand Torsten H. Nilson, 2003-04-11 This book explores the increasingly important topic of brand building within the one-to-one concept. It explains how to achieve what all marketers dream about: a product or service customized for each individual customer that is both a good value for the customer and a profitable venture for the producer. It uses practical tools and case studies to show how a company can optimize its brand marketing resources.

Out of Another @#&*% Crisis! Mike Micklewright, 2009-12-15 In 1982 Dr W Edwards Deming wrote *Out of the Crisis*. At that time the United States was enduring a crisis of low quality and high costs. Its previous dominance in the provision of goods and services was being challenged primarily by the Japanese. American consumers were becoming choosier in their product choices and when given two products of equal price they were choosing the product with the higher quality levels regardless of where it was built. So where does the United States stand today? Has it settled into an acknowledged competitive position? 28 years later, have we remembered Dr Deming's words and his 14 Points, or have we forgotten all he taught so little time ago? This book explores just that. One of its purposes is to dissect each of the principles and see how we rate as a society, as an economy, and as a country when compared to these principles that the very wise Dr Deming defined for us in the early 80s. It analyzes how practices and tools such as quality circles, total quality management, zero defects, benchmarking, balanced scorecard, reengineering, ISO 9001, Six Sigma, and lean either support or do not support Deming's principles. The goal of this book is to resurrect the Deming principles to create more Demingites who will also preach and spread the word of Deming for the good of society and to shock and tell it like it is, much like Deming would. The

quality professionals and Deming community and heck the top management of every organization really need to read chapter 3 of this book How do U S Companies Rate Today against Deming s 14 Points Mike provides a lot of facts and data to support his case This sole chapter is worth the price of the book But you also have to see the rest Alberto A Molinar ASQ CQE CQA
