

B.Com. DEGREE (C.B.C.S.) EXAMINATION MODEL QUESTION PAPER - II

Fifth Semester

COST ACCOUNTING - I

Time : Three Hours

Maximum Mark : 80

Part A

Answer any 10 questions. Each questions carries 2 marks.

1. **Define cost accountancy.**

The Institute of Cost and Management Accountants, London has defined Cost Accountancy as "the application of costing and cost accounting principles, methods, and techniques to the science, art and practice of cost control and the ascertainment of profitability. It includes the presentation of information derived therefrom for the purpose of managerial decision-making."

2. **What is meant by marginal costing?**

It is the ascertainment of marginal cost by differentiating between fixed and variable cost. It is used to ascertain the effect of changes in volume or type of output on profit.

3. **What do you mean by a profit centre?**

A profit centre is that segment of activity of a business which is responsible for both revenue and expenses and discloses the profit of a particular segment of activity. Profit centres are created to delegate responsibility to individuals and measure their performance.

4. **What do you mean by chargeable expenses?**

Expenses other than direct material or labour which are specifically incurred for a particular product or process are known as chargeable expenses or direct expenses.

5. **What is danger level?**

Danger level is a level at which normal issues of the material are stopped and issues are made only under specific instructions. The purchase officer will make special arrangements to get the materials which reach at their danger level so that the production may not stop due to shortage of materials.

$\text{Danger level} = \text{Average consumption} \times \text{Maximum re-order period for emergency purchases}$

6. **What is LIFO?**

Last In First Out-Under this method issues are priced from the latest available consignment, that is

the price of the latest purchase is taken first. This method is suitable in times of rising price.

7. **Define Waste.**

That part of basic raw material which is lost in processing and does not have any recovery value. Such waste may arise due to the inherent nature of materials, chemical reaction, evaporation etc.

8. **What is meant by labour turnover?**

Labour turnover denotes the percentage change in the labour force of an organisation. High percentage of labour turnover denotes that labour is not stable and there are frequent changes in the labour force because of new workers engaged and workers who have left the organisation.

9. **What is different piece rate?**

It means that two piece rates are fixed, one for the efficient workers and the other for less efficient. A worker who finishes the work within the standard time is paid at a higher rate. But the worker who cannot complete the work within the standard time is paid at a lower rate. Advantages of this method are as follows:-

1. Efficient workers receive good incentives.
2. This is a very simple method and the wages can be calculated easily.
3. This method reduces the overhead expense per unit.

Disadvantages are as follows:-

1. In this method, workers are punished with payments at lower rates.
2. The workers are not guaranteed any minimum wages, and they are insecure about their wages.
3. The health of the workers are affected adversely, as they put in more efforts to meet the standard time.

10. **Distinguish between scrap and spoilage.**

(a) Scrap is the result of the processing of materials. Spoilage is due to defect in materials or operations.
