A Theory of Syntax for Systemic Functional Linguistics Robin P. Fawcett, 2000-01-01 This book describes and evaluates alternative approaches within Systemic Functional Linguistics SFL to representing the structure of language at the level of form It assumes no prior knowledge of SFL and can therefore be read as an introduction to current issues within the theory It will interest any linguist who takes a functional approach to understanding language Part 1 summarizes the major developments in the forty years of SFL's history including alternative approaches within Halliday's own writings and the emergence of the Cardiff Grammar as an alternative to the Sydney Grammar It questions the theoretical status of the multiple structure representations in Halliday's influential Introduction to Functional Grammar 1994 demonstrating that Halliday's model additionally needs an integrating syntax such as that described in Part 2 Part 2 specifies and discusses the set of categories and relationships that are needed in a theory of syntax for a modern computer implementable systemic functional grammar The theoretical concepts are exemplified at every point usually from English but occasionally from other languages The book is both a critique of Halliday's current theory of syntax and the presentation of an alternative version of SFL that is equally systemic and equally functional

Studies in Functional Discourse Grammar J. Lachlan Mackenzie, María de los Ángeles Gómez-González, 2005 This book contains eight studies on Functional Discourse Grammar FDG with work by FDG's foremost proponents who provide both an introduction to the theory and a glimpse of current research projects FDG derives its name from taking the discourse act as the basic unit of linguistic analysis Each such unit receives four parallel analyses displaying its interpersonal representational morphosyntactic and phonological characteristics respectively What is striking about the emergence of FDG is that it enters into lively debate with various other contemporary frameworks that share its functionalist orientation This facet of FDG is highlighted in this book every chapter of which brings out the interconnectedness of current theoretical trends

Functional Descriptions Ruqaiya Hasan, Carmel Cloran, David Butt, 1996-01-01 This volume focuses on the relation between theory and description by examining aspects of transitivity in different languages Transitivity or case grammar to use the popular term has always occupied a centre stage position in linguistics not least because of its supposedly privileged relation to states of affairs in the real world Using a systemic functional perspective the ten papers in this volume make a contribution to this scholarship by focusing on the transitivity patterns in language as the expression of the experiential metafunction Through a study of different languages English Dutch German Finnish Chinese and Pitjantjatjara the contributors provide functional descriptions of the various categories of process their participants and circumstances including phenomena such as di transitivity causativity the get passive etc With the relation between theories

and descriptions running through the ten chapters of this volume as sometimes an overt and sometimes a covert theme the chapters point to the nature of the linguistic fact which is linked ineluctably on the one hand to the nature of the theory and on the other to the speakers experience of the world in which they live The majority of papers included in the volume derive from the 19th International Systemic Functional Congress at Macquarie University *Invitation to Systemic Functional Linguistics Through the Cardiff Grammar* Robin Fawcett, 2008-07 This short book is intended for two groups of readers and so is two books in one First it is a genuinely introductory introduction to Systemic Functional Grammar SFG for the 21st century But this is also a book for experienced linguists who are interested in a scholarly comparison of the two main current versions of SFG the Sydney Grammar and the Cardiff Grammar e g teachers of the first group of readers Introducing Systemic Functional Linguistics Hui Yu, Chenguang Chang, Bo Wang, Yuanyi Ma, 2025-09-12 This book provides a comprehensive introduction to Systemic Functional Linguistics SFL covering key concepts and contributions to the field and instructing beginners to apply SFL to different areas Authored by contributors with extensive experience of teaching SFL this book is composed of 14 chapters covering theories descriptions and applications of SFL It encompasses the following topics SFL theory and the organizing principles descriptions of various lexicogrammatical and semantic systems grammatical metaphor register studies different areas of SFL application including translation studies multimodal discourse analysis and educational linguistics Suitable to be used as teaching materials the chapters are carefully organized into sections of learning outcomes key terms exercises and suggested readings By introducing the theory and applications of SFL in accessible terms and requiring no prior knowledge this practical book is a key reading for students new to the area **Coherence and the Textual Function in "The Curious Incident of the Dog in the Night-time"** Marieke Jochimsen, 2010-04 Seminar paper from the year 2008 in the subject English Language and Literature Studies Linguistics grade 2.0 University of Münster

Englisches Seminar course Systemic Functional Linguistics language English abstract Wherever we look we see language constituting the world not just reflecting it For instance the words for colours make a reality they don't just name things which are there the spectrum isn't divided into seven primary colours all the colours merge into one another According to structural linguistics by using language we are not reflecting a given reality but are rather construing one Systemic functional grammar developed by M. A. K. Halliday states just this construal feature of language as well That language functions to make meanings and not to only refer to the outside world But furthermore elaborates on how a text makes those meanings It focuses therefore on the functional description of language The basic assumption is that language use is always functional people do not just talk or just write 2 but rather any use of language serves a specific purpose namely to make meanings The primary concern of systemic functional linguistics can therefore be summed up under the questions How is language structured for use 3 How does it make meanings According to Halliday language makes meanings on three different levels simultaneously on the experiential level because it represents experience on the interpersonal level because

language is used to interact with each other and on the textual level because we organize our message somehow This research paper will focus on the textual metafunction of language which is the theory of the clause being organized as a message The aim is to show that text itself construes the context by involving meaningful choices concerning what to put in thematic position and by means of cohesion Thus context is not only created through coherence i e the outside knowl

Word-order Variation in Isaiah 40-55 Michael Rosenbaum,2018-07-17 What is the significance of word order variation in Isaiah 40 55 This work attempts to answer that question through the application of a functional linguistic model A model is outlined which is drawn primarily from Functional Grammar and a metalanguage is developed which also incorporates insights and terminology from Prague School linguistics and Discourse Analysis According to this model all languages develop a basic functional pattern into which constituents are placed in a consistent familiar order according to the function which those constituents serve in a discourse context Additionally languages develop special positions which can be used to mark constituents with certain functions Topic Theme Setting Focus Tail Vocative and Parenthetical A functional pattern the basic pattern plus the special positions is outlined for the language of verbal clauses in Isaiah 40 55 Also rules are written which describe the placement of constituents in the functional pattern Each of the functions outlined in the model and defined in the metalanguage is illustrated in the language of Isaiah 40 55 Finally there is a chapter which outlines the many defamiliar or poetic patterns found in Isaiah 40 55 due to the foregrounding of the language In conclusion it is observed that the order of constituents in the language of Isaiah 40 55 frequently does not emulate the basic functional pattern Two explanations are demonstrated for this phenomenon first Deutero Isaiah makes frequent use of special positions to mark certain functions and second the language of Isaiah 40 55 is foregrounded or poetic and highly defamiliarizing

Yoon, 2019-04-09 In A Discourse Analysis of Galatians and the New Perspective on Paul David I Yoon outlines discourse analysis from the framework of Systemic Functional Linguistics for analyzing Paul's letter to the Galatians From this analysis he determines whether the context of situation better reflects the New Perspective on Paul covenantal nomism or a more traditional perspective legalism The first half of the book introduces the New Perspective on Paul and discourse analysis followed by a detailed model of SFL discourse analysis with respect to register and context of situation The second half is a discourse analysis of Galatians This is the first monograph length study to address the New Perspective on Paul from a linguistic approach and will as such be of great interest to scholars of Pauline Studies linguistics and theology **The (In)Coherence of Divine Mercy** Ian B. Turner, 2024-10-02 How do texts of Scripture make sense or hold together as a unity This question is especially germane to the Masoretic Text of Hosea which is often seen as an unintegrated composition by some or an artful literary whole by others Such judgments often come without clear definitions and criteria for incoherence This book brings descriptive clarity to this issue through a discourse analysis of cohesion and coherence in Hosea 12 14 based on Systemic Functional Linguistics This study showcases the theme of divine mercy in Hosea 12 14 and gives readers tools for discourse linguistic analysis of the Hebrew Bible
