

Analysis of a Squirrel Gene Pool

Suppose that, after a natural disaster, a small population of 2000 squirrels were left behind. Between 1970 and 1990, they appeared at three isolated locations where they all lived at the same time. These locations are separated by miles and contain different resources (different types of food, different habitats, etc.). The data collected are presented in the tables below. The data are presented in a way that allows you to see the relationship between the different locations and the different resources. The data are presented in a way that allows you to see the relationship between the different locations and the different resources.
