HUMAN ANATOMY AND PHYSIOLOGY

Study of the human organism and its internal body

Anatomy

The study of the structure of the human body and its internal organs

Physiology

The study of the function of the human body and its internal organs

Structural levels

Studying the human body at the cellular, tissue, organ, and system levels

- 1. **Cellular level** - study of the structure and function of cells
- 2. **Tissue level** - study of the structure and function of tissues
- 3. **Organ level** - study of the structure and function of organs
- 4. **System level** - study of the structure and function of systems
- 5. **Whole body level** - study of the structure and function of the whole body

CELLS AND TISSUES

Cells are the basic units of structure and function of the human body

Characteristics of cells

All cells are eukaryotic and have a nucleus

Cells are specialized to perform specific functions

Cells are surrounded by a cell membrane

Cells are capable of self-renewal

Cells are capable of communication

Cells are capable of movement

Cells are capable of responding to stimuli

Cells are capable of maintaining homeostasis

Cells are capable of reproducing

Cells are capable of dying

Cells are capable of adapting

NERVOUS SYSTEM

Functions

1. **Control** - The nervous system controls the body's activities

2. **Integration** - The nervous system integrates information from the body and the environment

3. **Communication** - The nervous system communicates with other parts of the body

4. **Response** - The nervous system responds to stimuli

5. **Regulation** - The nervous system regulates the body's activities

6. **Coordination** - The nervous system coordinates the body's activities

7. **Organization** - The nervous system organizes the body's activities

8. **Management** - The nervous system manages the body's activities

9. **Leadership** - The nervous system leads the body's activities

10. **Supervision** - The nervous system supervises the body's activities

11. **Inspection** - The nervous system inspects the body's activities

12. **Investigation** - The nervous system investigates the body's activities

13. **Innovation** - The nervous system innovates the body's activities

14. **Improvement** - The nervous system improves the body's activities

15. **Invention** - The nervous system invents the body's activities

16. **Initiation** - The nervous system initiates the body's activities

17. **Implementation** - The nervous system implements the body's activities

18. **Installation** - The nervous system installs the body's activities

19. **Integration** - The nervous system integrates the body's activities

20. **Inspection** - The nervous system inspects the body's activities

21. **Innovation** - The nervous system innovates the body's activities

22. **Improvement** - The nervous system improves the body's activities

23. **Invention** - The nervous system invents the body's activities

24. **Initiation** - The nervous system initiates the body's activities

NERVOUS SYSTEM

The nervous system is the body's communication system

It consists of the brain, spinal cord, and nerves

The brain is the control center of the nervous system

The spinal cord is the main pathway for information

Nerves are the communication lines between the brain and the rest of the body

The nervous system is responsible for all of the body's activities

It controls the body's movements, thoughts, and feelings

It regulates the body's internal organs and systems

It maintains the body's homeostasis

It protects the body from harm

It repairs the body's tissues and organs

It replaces the body's cells

It regenerates the body's tissues and organs

It restores the body's homeostasis

It returns the body to its original state

It brings the body back to its original state

It brings the body back to its original state

It brings the body back to its original state

It brings the body back to its original state

It brings the body back to its original state

It brings the body back to its original state

It brings the body back to its original state

It brings the body back to its original state

It brings the body back to its original state

Parts of the nervous system

1. **Brain** - The control center of the nervous system

2. **Spinal cord** - The main pathway for information

3. **Nerves** - The communication lines between the brain and the rest of the body

4. **Neurons** - The basic units of the nervous system

5. **Glial cells** - The support cells of the nervous system

6. **Synapses** - The points of contact between neurons

7. **Receptors** - The cells that receive information from the environment

8. **Effectors** - The cells that respond to information from the nervous system

9. **Muscles** - The tissues that contract and move the body

10. **Glands** - The organs that secrete hormones and other chemicals

11. **Sensory organs** - The organs that detect information from the environment

12. **Motor organs** - The organs that respond to information from the nervous system

13. **Support organs** - The organs that provide support and protection for the nervous system

14. **Protective organs** - The organs that protect the nervous system from harm

15. **Regulatory organs** - The organs that regulate the nervous system's activities

16. **Control organs** - The organs that control the nervous system's activities

17. **Coordination organs** - The organs that coordinate the nervous system's activities

ORGAN SYSTEMS OF THE BODY

The body is made up of many different organ systems

Each organ system has a specific function

The organ systems work together to keep the body healthy

They are responsible for all of the body's activities

They control the body's movements, thoughts, and feelings

They regulate the body's internal organs and systems

They maintain the body
