the important diseases which might affect that system As each disease is described the reader is encouraged to consider the corresponding Chinese medical perspective The textbook concludes with chapters relating specifically to dealing with patients in practice In particular these focus on warning signs of serious disease supporting patients on medication and ethical issues which may arise from management of patients which is shared with conventional practitioners The book also offers a detailed summary of Red Flag symptoms which are those which should be referred for Western medical investigation or emergency medical treatment and also a guide to how patients can be safely supported in withdrawing from conventional medication when this is clinically appropriate Those wishing to use the text for systematic study can make use of the question and problem solving approach offered on the accompanying CD to which references to self study exercises appear at regular stages throughout the book This means that the text can be easily adapted to form the basis of a study course in clinical medicine for students of complementary medicine In addition to the self testing questions and answers the supporting CD also contains checklists for revision and full colour illustrations
