Fascial Dysfunction Leon Chaitow, 2018-11-01

Fascial dysfunction is now recognised as one of the main underlying causes of musculoskeletal pain leading to impaired and reduced mobility. These are the symptoms which confront all practitioners of manual therapy in their everyday practice. In this second edition of his very successful book, Leon Chaitow brings together contributions from 20 leading practitioners and researchers from many different fields of manual therapy. *Fascial Dysfunction: Manual Therapy Approaches, Second Edition* aims to help those practitioners to assess more precisely the dysfunction of their clients and its cause, and to increase practitioner awareness of the various techniques which may help them in their attempts to alleviate their clients' problems.
