Applied Quantitative Analysis in Education and the Social Sciences Yaacov M. Petscher, Christopher Schatschneider, Donald L. Compton, 2013 To say that complex data analyses are ubiquitous in the education and social sciences might be an understatement Funding agencies and peer review journals alike require that researchers use the most appropriate models and methods for explaining phenomena Univariate and multivariate data structures often require the application of more rigorous methods than basic correlational or analysis of variance models Additionally though a vast set of resources may exist on how to run analysis difficulties may be encountered when explicit direction is not provided as to how one should run a model and interpret results The mission of this book is to expose the reader to advanced quantitative methods as it pertains to individual level analysis multilevel analysis item level analysis and covariance structure analysis Each chapter is self contained and follows a common format so that readers can run the analysis and correctly interpret the output for reporting

Sedimentary Basins and Crustal Processes at Continental Margins G.M. Gibson, F. Roure, G. Manatschal, 2015-10-19 Continental margins and their fossilized analogues are important repositories of natural resources With better processing techniques and increased availability of high resolution seismic and potential field data imaging of present day continental margins and their embedded sedimentary basins has reached unprecedented levels of refinement and definition as illustrated by examples described in this volume This in turn has led to greatly improved geological geodynamic and numerical models for the crustal and mantle processes involved in continental margin formation from the initial stages of rifting through continental rupture and break up to development of a new ocean basin Further informing these models and contributing to a better understanding of the features imaged in the seismic and potential field data are observations made on fossilized fragments of exhumed subcontinental mantle lithosphere and ocean continent transition zones preserved in ophiolites and orogenic belts of both Palaeozoic and Mesozoic age from several different continents including Europe South Asia and Australasia
