Earl, 2022-07-28 This book is unique among modern contributions to behavioral economics in presenting a grand synthesis between the kind of behavioral economics popularized by Richard Thaler earlier approaches such as those of the 1978 Nobel Laureate Herbert A. Simon, evolutionary psychology and evolutionary economics from Veblen and Marshall through to neo-Schumpeterian thinking. The synthesis employs a complex adaptive systems approach to how people think, the lifestyles they build and how new production technologies and products are gradually adopted and produce changes. Using a huge range of examples it takes behavioral economics from its recent focus on nudging consumers to the behavior of firms and other organizations, the challenges of achieving structural change and transitioning to environmentally sustainable lifestyles and instability of the financial system. This book will be of great interest to academics and graduate students who seek a broader view of what behavioral economics is and what it might become. *Automotive Audits* D. H.
