Investigations on Car Seat Belts and Manual Exertion for Operation of Release Mechanism R. A. Fell,1963 *MOTOR VEHICLE SEAT BELT ASSEMBLY INSTALLATIONS* Seat Belt Systems Standards Committee,1973 It is the purpose of this SAE Recommended Practice to provide general installation instructions for universal type seat belt assemblies for installation in either a commercial or passenger car vehicle Its primary intent is to provide guidance in the installation of seat belt assemblies meeting the requirements of the SAE J4 and Section 571 209 in the code of Federal Regulations of the National Highway Traffic Safety Administration These minimum instruction requirements may be supplemented by more specific manufacturer s instructions if they are necessary to provide proper installation in a particular vehicle Seat Belt Performance of Manual and Automatic Systems Installed in the GM Chevrolet Chevette and the VW Rabbit. Technical Report J. B. Morris,1979 *Audi A3 Service and Repair Manual* A. K Legg,Peter T. Gill,2008 Seat Belt Hardware Performance Requirements Motor Vehicle Council,2013 This SAE Recommended Practice describes performance requirements for hardware used in motor vehicle seat belt assemblies when tested in accordance with the test procedures specified in SAE J140 Test procedures and performance requirements for retractors will be covered in separate SAE Recommended Practices to be issued later SAE J140 defines the test procedures for abrasion testing of the webbing used in seat belt assemblies SAE J141 defines the acceptance requirements for these tests The testing and test sequences are similar but not identical to what is defined in FMVSS 209 and TP 209 The legal requirements for web abrasion have been the same for many years No evidence has been presented of any field concerns arising from shortcomings in the FMVSS and TP requirements It is proposed to revise SAE J140 and SAE J141 to make them consistent with the FMVSS and TP regulations with some small exceptions These exceptions are the changes and clarifications proposed by the AORC to NHTSA in December of 2008 It is expected that NHTSA will adopt the AORC proposals eventually Also it is proposed to add web abrasion requirements to SAE J140 and SAE J141 for seat belt systems that do not use a manual adjusting latchplates The existing abrasion requirements of SAE J140 and SAE J141 only include systems with manual adjusting latchplates These devices are not used in most seat belts today It is proposed to adopt the hex bar abrasion requirements of FMVSS 209 for seat belts that do not include a manual adjustable latchplate It is reasonable to require some degree of abrasion resistance for seat belt webbing No evidence has

been presented to show that the current FMVSS abrasion standard is inadequate A clarification has been added so that it is understood that the manual adjust latchplate tilt lock requirements do not apply to semi cinching latchplates or dynamically cinching latchplates Semi cinching latchplates are intended to meet the child seat locking requirements of FMVSS 208 S7 1 1 5 which can be met without passing the tilt lock test Dynamically locking latchplates are intended to improve performance in NCAP or other crash testing The locking requirements of such devices are best defined by the vehicle manufacturer to optimize performance in the specific applications The section of SAE J140 1 about attachment hook retention was deleted Attachment hooks have not been used in light vehicles for many years Similarly the section on lift buckles was also removed for the same reason Section 4 5 2 does refer to buckles of other types so there is a requirement for any potential future buckle release design Also FMVSS 208 S7 2d requires that buckles be activated by push buttons The sections on buckle compression have been harmonized with FMVSS 209 The requirement for web resistance to microorganisms has been deleted It was included in the chart in SAE140 4 1 but not defined All web in current use is made of synthetic fiber and not subject to the microorganism requirements of FMVSS 209 A section defining the light resistance was added to J140 and J141 Light resistance was already in the chart in SAE J140 4 1 but the requirements were not defined The light resistance requirements were taken from the AORC proposal of December 2008
