in an Era of Accountability Henry Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the

measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Linking Teacher Preparation Program Design and Implementation to Outcomes for Teachers and Students Jennifer E. Carinci, Cara Jackson, Stephen J. Meyer, 2020-02-01 Improving the use of evidence in teacher preparation is one of the greatest challenges and opportunities for our field The chapters in this volume explore how data availability quality and use within and across preparation programs shed light on the structures policies and practices associated with high quality teacher preparation Chapter authors take on critical questions about the connection between what takes place during teacher preparation and subsequent outcomes for teachers and students which has remained a black box for too long Despite a long history of teacher preparation in the U S and a considerable investment in preservice and in service training much is still to be learned about how pre service preparation impacts teacher effectiveness A strong empirical basis that informs how specific aspects of and approaches to teacher preparation relate to outcomes for graduates and their preK 12 student outcomes will provide a foundation for improved teaching and learning Our book responds to stakeholders collective responsibility to students and teachers to act more deliberately Issues of data availability and quality the uses of data for improvement priorities for future research and opportunities to promote evidence use in teacher preparation are discussed throughout the volume to inspire collective action to push the field towards more use of evidence Chapters present research that uses a variety of research designs methodologies and data sources to explore important questions about the relationship between teacher preparation inputs and outcomes
