Representations and Communication Endong, Floribert Patrick C., 2019-12-06 The human condition has continued to improve phenomenally in today's world with the development of technology and medicine. This includes developing countries in areas such as Africa, Asia, and South America. Despite the emergence of economy, education, and infrastructure in these regions, media outlets continue to forego their advancements in favor of the negativities that plague these states, such as poverty, hunger, and corruption. There is a need to research international media portrayals of the less developed world to ascertain the myth that these areas are still struggling. *Deconstructing Images of the Global South Through Media Representations and Communication* provides emerging research exploring the theoretical and practical aspects of how global media analyzes developing countries. Featuring coverage on a broad range of topics such as cultural affirmation, online platforms, and audience perception, this book is ideally designed for communications specialists, journalists, broadcasters, newscasters, conflict photographers, media practitioners, policymakers, international relations experts, column writers, editors, students, politicians, government officials, researchers, and academicians seeking current research on the world's perception of developing countries through media coverage. **Consumers' Guide**, 1937
