A Vietnam Trilogy, Vol. 3: War Trauma Raymond M. Scurfield, 2006 War Trauma draws on the experience of prior wars for valuable insights to help people who are now in the military or in the healing professions and their families and communities to deal with todays realities of combat and its aftermath which so often entails PTSD post traumatic stress syndrome depression and the risk of suicide This is part three in A Vietnam Trilogy which studies the psychiatric impact of war on soldiers and veterans and their families The effects go on for decades after the violence occurred and we are still just learning to understand the depth and variety of problems it can cause Further Scurfield documents his proven innovative therapies for treating PTSD This third volume looks at what military and mental health professionals and the Veterans Administration VA should have learned from the Vietnam War in order to better protect American servicemen and servicewomen in later conflicts and to help them recover afterwards The Persian Gulf War for instance had an immense impact on veterans of all wars The author was a national faculty member for joint VA DOD training programs to enhance mental health response readiness for receiving anticipated medical and psychiatric casualties from the Persian Gulf War What he found was a resurgence of selective amnesia and denial about the true impact of war Scurfield notes Chillingly what happened in Vietnam in 1968 69 regarding psychiatric casualties has enormous parallels to what is happening today regarding U S psychiatric casualties from the Iraq War

Stress and Trauma Healing Evelyn Bartsch, Karl Bartsch, 1997

Searching for Normal in the Wake of the Liberian War Sharon Alane Abramowitz, 2014-07-28 At the end of Liberia s thirteen year civil war the devastated population struggled to rebuild their country and come to terms with their experiences of violence During the first decade of postwar reconstruction hundreds of humanitarian organizations created programs that

were intended to heal trauma prevent gendered violence rehabilitate former soldiers and provide psychosocial care to the transitioning populace But the implementation of these programs was not always suited to the specific mental health needs of the population or easily reconciled with the broader aims of reconstruction and humanitarian peacekeeping and psychiatric treatment was sometimes ignored or unevenly integrated into postconflict humanitarian health care delivery Searching for Normal in the Wake of the Liberian War explores the human experience of the massive apparatus of trauma healing and psychosocial interventions during the first five years of postwar reconstruction Sharon Alane Abramowitz draws on extensive fieldwork among the government officials humanitarian leaders and an often overlooked population of Liberian NGO employees to examine the structure and impact of the mental health care interventions in particular the ways they were promised to work with peacekeeping and reconstruction and how the reach and effectiveness of these promises can be measured From this courageous ethnography emerges a geography of trauma and the ways it shapes the lives of those who give and receive care in postwar Liberia
