Award Association for Educational Communications Technology AECT A book that explores the problematic connection
between education policy and practice while pointing in the direction of a more fruitful relationship Inside the Black Box of
Classroom Practice is a provocative culminating statement from one of America s most insightful education scholars and
leaders Inside the Black Box of Classroom Practice takes as its starting point a strikingly blunt question With so many major
structural changes in U S public schools over the past century why have classroom practices been largely stable with a
modest blending of new and old teaching practices leaving contemporary classroom lessons familiar to earlier generations of
school goers It is a question that ought to be of paramount interest to all who are interested in school reform in the United
States It is also a question that comes naturally to Larry Cuban whose much admired books have focused on various aspects
of school reform their promises wrong turns partial successes and troubling failures In this book he returns to this territory
but trains his focus on the still baffling fact that policy reforms no matter how ambitious or determined have generally had
little effect on classroom conduct and practice Cuban explores this problem from a variety of angles Several chapters look at
how teachers in responding to major policy initiatives persistently adopt changes and alter particular routine practices while
leaving dominant ways of teaching largely undisturbed Other chapters contrast recent changes in clinical medical practice
with those in classroom teaching comparing the practical effects of varying medical and education policies The book s
concluding chapter distills important insights from these various explorations taking us inside the black box of the book s
title those workings that have repeatedly transformed dramatic policy initiatives into familiar and largely unchanged

The Cost-Effectiveness of 22 Approaches for Raising Student Achievement Stuart S. Yeh,2011-03-01 As a consequence of the federal No Child Left Behind NCLB law there is tremendous pressure on school principals teachers school superintendents district staff state departments of education and governors to maximize the increase in student achievement that is obtained with every dollar of expenditure Currently teachers are forced to rely on extremely inefficient approaches that take enormous amounts of time both during the school day and throughout the K 12 learning years This is experienced in terms of the reduced time that is available to teach subjects other than math and reading as schools resort to double periods of math double periods of reading and enormous amounts of remedial instruction that directly reduce the time available for other subjects including science art and music In contrast this book suggests that student achievement may be increased in a way that is not only cost effective in dollar terms but efficient in the sense that it does not rely on unusual investments in the time required to obtain results The book draws upon a wealth of cost effectiveness data to dispel common notions about what works in addressing the achievement gap increased expenditure per pupil charter schools voucher programs increased educational accountability class size reduction comprehensive school reform increased teacher salaries more selective teacher recruitment the use of value added methods to measure and reward teacher performance the

use of National Board teacher certification to identify high performing teachers and a host of other approaches
