GRAPHING LINEAR EQUATIONS (By Slope-Intercept)		Use the steps below to graph an equation using slope-intercept form.	
1		Write the equation in slope-intercept form.	
2		Graph the y-intercept. This is always point (0, b).	
3		Use the slope of the line to create more points. Remember slope is $\frac{rise}{run}$.	
4		Use a ruler to draw a line that extends through the points, placing an arrow at both ends.	
Directions: Graph each equation using the slope-intercept method.			
1. $y = -2x + 3$	2. $y = -3x - 1$	3. $y = \frac{2}{3}x + 2$	
			
4. $y = -\frac{1}{2}x + 3$	5. $y = 2x + 5$	6. $y = -\frac{3}{2}x - 5$	
			
7. $y = -4x$	8. $y = -3x + 3x$	9. $y = 1 - \frac{4}{3}x$

Functional Equations and How to Solve Them Christopher G. Small,2007-04-03 Over the years a number of books have been written on the theory of functional equations However very little has been published which helps readers to solve functional equations in mathematics competitions and mathematical problem solving This book fills that gap The student who encounters a functional equation on a mathematics contest will need to investigate solutions to the equation by finding all solutions or by showing that all solutions have a particular property The emphasis here will be on the development of those tools which are most useful in assigning a family of solutions to each functional equation in explicit form At the end of each chapter readers will find a list of problems associated with the material in that chapter The problems vary greatly with the easiest problems being accessible to any high school student who has read the chapter carefully The most difficult problems will be a reasonable challenge to advanced students studying for the International Mathematical Olympiad at the high school level or the William Lowell Putnam Competition for university undergraduates The book ends with an appendix containing topics that provide a springboard for further investigation of the concepts of limits infinite series and continuity

Understanding the Use of Linear Functions Cara E. West, 2017 Linear functions are addressed in Eighth Grade Mathematics class all through Algebra II in the State of Oklahoma s Standards It does not go away after Algebra II as it is reviewed in Pre Calculus Trigonometry and Calculus Lines are everywhere in the world On paper we use lines to write letters On roads we use lines for safety On street signs we use lines to show lanes or road steepness On products we purchase at the store lines are in labeling and nutritional information On clothing we use lines to help in cutting the fabric as well as designs Even in our homes we use lines to make frames level and plum Lines are also used in the formation of polygons In this unit students will learn how to identify linear functions graph linear functions and analyze linear relationships Students are taught the three forms of linear equations and expected to understand how to translate between them The skills learned in this unit will be a strong foundation for future learning by the students
