

Fossil Patterns Show the Order of Flood Deposits

Because there is a clear order in the rock layers, we can look closely at the fossils contained in each of these layers to get clues about why the creatures were deposited in this particular sequence. We find a definite sequence of fossils (Figure 4) that show evidence of waters rising and progressively burying different ecological zones. We also see patterns of fossilized tracks in rock layers lower than we find the actual fossilized creature (Figures 5-6).

VERTEBRATE TRACKWAYS BELOW VERTEBRATE FOSSILS (FIGURE 6)

Reptile footprints (right) are found much lower than the fossilized bodies of reptiles in the Grand Canyon. This strange pattern is easy to explain if the reptiles were scrambling to safety with each incoming deposit, until they died in exhaustion.

TRILOBITE TRACKS ABOVE TRILOBITE FOSSILS (FIGURE 5)

Trilobite footprints (bottom right) are consistently found lower than the fossilized bodies of trilobites (upper right). This pattern makes sense if these shallow marine invertebrates were scrambling to safety with each incoming deposit of mud, until they died in exhaustion.

ORDER OF CREATURES BURIED IN THE GRAND STAIRCASE (FIGURE 4)

This table identifies the types of fossils found in each rock layer.

The fossils in bold text represent the first appearance of that type of fossil.

Controversy of the Ages Theodore Cabal, Peter Rasor, II, 2018-08-08 Controversy of the Ages carefully analyzes the debate by giving it perspective Rather than offering arguments for or against a particular viewpoint on the age of the earth the authors take a step back in order to put the debate in historical and theological context The authors of this book demonstrate from the history of theology and science controversy that believers are entitled to differ over this issue while still taking a stand against theistic evolution But by carefully and constructively breaking down the controversy bit by bit they show why the age issue is the wrong place to draw a line in the sand [Did Adam Have a Belly Button?](#) Ken Ham, 2001-10-15 Popular questions with answers that are both plausible and faith strengthening in a unique resource willing to answer confusing questions with fresh insights [The Conflict of the Ages Teacher Edition I-III](#) Michael J. A Christian Geologist Explains Why the Earth Cannot Be 6 000 Years Old Let's Heal the Divide in the Church By Dr Lorence G Collins

This book is about the geology of the Earth. Written by a fully committed Christian, it asserts that accepting the knowledge provided by studies in science is in no way in conflict with following the teachings of Jesus. If a Christian understands how God has done his creation, then he/she can be a better steward in taking care of the Earth and its life. The general themes of the book are to expose the false beliefs of young Earth creationists regarding the age of the Earth being 6 000 years old and that Noah's Flood must have been worldwide/global in extent and to suggest that the Bible is not a science text. The contents of this book can be understood by both people trained in science and those who have no background in science. It is intended to give a valuable source of insights about how science works to provide a way to support and guide a Christian witness to the world and to be a bridge to make this possible. As Christians, our greater mission is not to battle over divisions in religious beliefs but to heal the sick, feed the hungry, minister to the abandoned and so on. *The Great Creation Debate* Brad Freckleton, 2012-07

Why isn't the evolution of flight shown in the fossil record? Bugs, birds, bats, and dinosaurs flew and are shown fully formed in the fossil record, but there are no animals with halfway wings in the fossil record leading from ground-based animals to flying animals. What is desperately wrong with the Grand Canyon if evolution is true? Where are the massive signs of erosion between the sedimentary layers of the Grand Canyon if they were laid down a million years at a time? Why does massive erosion only show up at the top? Animals with well-developed eyes show up suddenly in the fossil record as do flying animals. It's the norm for plants and animals to show up in the fossil record with the same separations as we see in different types of living animals and plants today. The second law of thermodynamics is a law of science that says everything left to its own will wear out, run down. It is a fundamental law of science. So how did evolution accidentally go up? How could a DNA molecule fumble together? The cell needs DNA; DNA needs the cell, which came first. Beneficial mutations also weaken in other areas and don't write evolutionary-advancing DNA code. Spiral galaxies, which have the shape of a starfish that is spinning quickly throughout our universe like our Milky Way galaxy, are supposed to be over 10 billion years old. If they were over a billion years old, they would lose their spiral arm shape. The arms of our galaxy, the Milky Way, only show a maximum age of 0.3 billion years. People want to know why they're here now and where they're going to go. They want surety of truth also. Read this book and see how well evolution holds up in all the sciences. Read this book and see if life can have meaning, direction, and hope with surety. For those who claim to be open-minded, put on your seatbelts and keep your arms inside as you ride the roller coaster of your own value systems. **Friend of Science, Friend of Faith** Gregg Davidson, 2019-11-19

A scientist explores the harmony between Christian faith and science. Though some Christians and many skeptics see science and Christianity as locked in a never-ending battle, geologist Gregg Davidson contends that there is tremendous harmony.

between Scripture and modern science. Many apparent conflicts arise when the Bible is interpreted apart from its literary and historical contexts but when these are taken into account most alleged clashes resolve. Proceeding from a belief that Scripture is inspired and without error and that God's creation should inform how we interpret the Bible, Davidson shows that Scripture and science need not disagree on issues like the age of the earth, Adam and Eve, Noah's flood, the origin and development of life, and numerous related topics. Rather, Christians can rejoice at how God's glory is revealed in both the Bible and the natural world.
