Psybersecurity: Human Factors of Cyber Defence is a clarion call to action in the face of a stark reality: over 90% of cyberattacks exploit human vulnerabilities, as highlighted by the 2022 Global Risks Report from the World Economic Forum. This gap between the rapid advancement of cyber security technologies and the slower pace of development in human-centric defences poses a formidable challenge to national security and personal safety. Amidst the dazzling progress of AI technologies like ChatGPT and Microsoft Security Copilot, the human element of cyber security remains critically underdeveloped. Set against the backdrop of the Australian government's ambitious goal to become the world's most cybersecure nation by 2030, this book embarks on a mission to address the overlooked human factors in cyber defence. It advocates for a balanced approach that not only relies on technological advancements but also significantly enhances the human aspects of cyber security. Through an interdisciplinary exploration, *Psybersecurity* delves into how cyberthreats exploit human vulnerabilities and offers innovative solutions for building resilience against these vulnerabilities. critiques existing cyber security education frameworks proposing a comprehensive curriculum that equips individuals with technical skills and the behavioural competencies needed to navigate the cyber landscape ethically and effectively It also addresses AI s ethical dilemmas and psychological impacts offering a forward looking perspective on combating AI driven harassment and endorsing a new field of study Psybersecurity Psybersecurity Human Factors of Cyber Defence aims to bridge the gap between cyber security and human sciences ignite a transformation in understanding and fortify our digital world It is an essential read for academics professionals and anyone committed to building a safer more resilient cyber future in alignment with Australia s 2030 vision
