

Closing Ceremony Speech - SGS MUN 2019

We were all here this weekend to represent our countries, push ourselves in debate, and pass good resolutions. But although our success in these things is important to us, I would like to take a few minutes to talk about, not success, but failure.

Having participated in our discussions, we should remember that there is no such thing as an overnight success; it's a fallacy, a myth pedalled in a world where someone may be virally catapulted to fame as an internet phenomenon in a matter of 24 hours. What I would like us to dwell on as this weekend is drawing to a close, is the work, the process that takes us towards success, towards our goals. That process sometimes includes failure. Not winning an award, but focusing on learning and improving.

There was once a lady in a market place, she saw Picasso and asked him for a self-portrait. He agreed...and drew a perfect picture in 30 seconds. He then handed it back to her and asked for \$30,000. She questioned how it could cost that much when it only took him 30 seconds. He replied, "It took me 30 years to be able draw that in 30 seconds".

It's amazing how - so often - the time taken to achieve success is forgotten; how frequently we forget what lies beyond the tip of the iceberg, the shadowy section underneath the water. But that part, the part we don't see, the part full of failure, learning and progress, is absolutely what makes success possible. If we have experienced that success today, it is because we have invested time, valued experience and learned from our mistakes and failures.

When you look at the definition of failure in the dictionary, it is defined by three words: lack of success. If we fear failure and imperfection, it ultimately means that we don't value growth and learning, it means we don't value experience and struggle, and our obsession with winning means that we're actually letting go of what we could be learning at every single point. So I hope that this weekend you have been brave and courageous in your discussions, have not be afraid to express your views. To those of you who did not win awards today, keep trying. There are always more conferences to get involved in. Learn from your mistakes, whether it is improving your public speaking skills, spending more time researching issues or gaining confidence in the committee room. Being open to improvement is important.

Linguistic Biomarkers of Neurological, Cognitive, and Psychiatric Disorders: Verification, Analytical Validation, Clinical Validation, and Machine Learning Ratree Wayland, Si Chen, Kevin Tang, 2024-08-07 Degeneration of nerve cells that control cognitive speech and language processes leading to linguistic impairments at various levels from verbal utterances to individual speech sounds could indicate signs of neurological cognitive and psychiatric disorders such as Alzheimer's disease AD Parkinson's disease PD amyotrophic lateral sclerosis ALS dementias depression autism spectrum disorder schizophrenia etc Currently these disorders are diagnosed using specific clinical diagnostic criteria and neuropsychological examinations However speech based biomarkers could potentially offer many advantages over current clinical standards In addition to being objective and naturalistic they can also be collected remotely with minimal instruction and time requirements Furthermore Machine Learning algorithms developed to build automated diagnostic models using linguistic features extracted from speech could aid diagnosis of patients with probable diseases from a group of normal population To ensure that speech based biomarkers are providing accurate measurement and can serve as effective clinical tools for detecting and monitoring disease speech features extracted and analyzed must be systematically and rigorously evaluated Different machine learning architectures trained to classify different types of disordered speech must also be rigorously tested and systematically compared

Conversational Informatics Toyooki Nishida, 2008-03-11 Conversational informatics investigates human behaviour with a view to designing conversational artifacts capable of interacting with humans in a conversational fashion It spans a broad array of topics including linguistics psychology and human computer interaction Until recently research in such areas has been carried out in isolation with no attempt made to connect the various disciplines Advancements in science

and technology have changed this Conversational Informatics provides an interdisciplinary introduction to conversational informatics and places emphasis upon the integration of scientific approaches to achieve engineering goals and to advance further understanding of conversation It features a collection of surveys structured around four prominent research areas conversational artifacts conversational contents conversation environment design and conversation measurement analysis and modelling Conversational artifacts shows how synthetic characters or intelligent robots use eye gaze gestures and other non verbal communicators to interact Conversational contents looks at developing techniques for acquiring editing distributing and utilising the contents that are produced and consumed in conversation Conversation environment design explains techniques for creating intelligent virtual environments and for representing individuals within a virtual environment by monitoring and reproducing their non verbal conversational behaviour Conversation measurement analysis and modelling demonstrate how conversational behaviour can be measured and analyzed Conversational Informatics will be an invaluable resource for postgraduate students and researchers in Computer Science and Electrical Engineering as well as engineers and developers working in the field of automation robotics and agents technology Schizophrenia Bulletin ,1999

Proceedings of the Fourth International Workshop on the History of Speech Communication Research Volín,Pavel Šturm,2021-09-01 This volume contains studies presented at the 4th International Workshop on the History of Speech Communication Research HSCR 2021 The series of workshops was initiated in Dresden in 2015 The current workshop took place in Prague at the Institute of Phonetics Charles University amid the ever changing pandemic circumstances for the first time in a hybrid form There are nine contributions written by 12 authors from six countries The contributions analyze the contextual background of particular personalities or investigate how specific research practices developed over time Moreover each contribution demonstrates a significant connection between various aspects of speech communication research and the wider social context A special theme of this workshop was the link in linguistic signs between the form sound and the meaning sense The phonetic endeavour was often claimed to concern only the form while meaning was delegated to someone else This is not only one sided but also difficult to integrate into the large body of scientific knowledge as the opening keynote emphasized Contemporary Sociolinguistics Aleksandr Davidovich Shve?t's?er,1986-01-01 The common core of different sociolinguistic schools includes a number of general problems such as the social differentiation of language the sociolinguistic aspects of bilingualism and diglossia the typology of linguistic situations language engineering national and standard languages and their social functions etc Still urgent to the sociolinguists of all countries and all trends is the problem of developing their own methodology and the application of research methods developed by other disciplines to sociolinguistics The above mentioned problems constitute the major thrust of this book It is not merely a summary of studies by a certain sociolinguistic school or even several schools the main goal of the author is to elucidate a number of major philosophical and theoretical questions fundamental problems of sociolinguistics and methods of sociolinguistic

Multilevel Dynamics in Developmental Psychopathology Ann S. Masten,2007-03-23 First Published in 2007 Routledge is an imprint of Taylor Francis an informa company **Stuttering** Joseph S. Kalinowski,Tim Saltuklaroglu,2005-11 This textbook presents a new paradigm for understanding the nature and treatment of stuttering based on recent discoveries in neuroscience The authors illustrate how visible stuttering manifestations are actually a solution to a central problem acting as a compensatory mechanism for a central involuntary block rather than a problem in themselves This book features methods that reduce stuttering by inhibiting this central block through the use of sensory and motor tools notably mirror neurons and shows readers that stuttering is not a condition that can be effortlessly trained out of the system or eliminated via simple speech retraining Artificial Neural Networks in Pattern Recognition Friedhelm Schwenker,Hazem M. Abbas,Neamat El Gayar,Edmondo Trentin,2016-09-08 This book constitutes the refereed proceedings of the 7th IAPR TC3 International Workshop on Artificial Neural Networks in Pattern Recognition ANNPR 2016 held in Ulm Germany in September 2016 The 25 revised full papers presented together with 2 invited papers were carefully reviewed and selected from 32 submissions for inclusion in this volume The workshop will act as a major forum for international researchers and practitioners working in all areas of neural network and machine learning based pattern recognition to present and discuss the latest research results and ideas in these areas **A Handbook on Stuttering, Seventh Edition** Oliver Bloodstein,Nan Bernstein Ratner,Shelley B. Brundage,2021-06-25 The revised edition of A Handbook on Stuttering continues its remarkable role as the authoritative first line resource for researchers and clinicians who work in the field of fluency and stuttering Now in its seventh edition this unique book goes beyond merely updating the text to include coverage of roughly 1

000 articles related to stuttering research and practice that have been published since 2008 This extended coverage integrates the more traditional body of research with evolving views of stuttering as a multi factorial dynamic disorder Comprehensive clear and accurate this text provides evidence based practical information critical to understanding stuttering By thoroughly examining the intricacies of the disorder A Handbook on Stuttering Seventh Edition lays the foundation needed before considering assessment and treatment New to the Seventh Edition A completely reorganized table of contents including two new chapters The deletion of approximately 1 000 non peer reviewed references from the previous edition to assure discussion of the highest quality evidence on stuttering New content on the development of stuttering across the lifespan and assessment Given the Handbook s historic role as a primary reference for allied professionals a new chapter that addresses myths and misconceptions about stuttering Expanded coverage on the role of temperament in childhood stuttering Expanded coverage of brain based research genetics and treatment findings A thoroughly updated chapter on conditions under which stuttering fluctuates Brief tutorial overviews of critical concepts in genetics neuroimaging language analysis and other relevant constructs to better enable reader appreciation of research findings A greater selection of conceptual illustrations of basic concepts and findings than in prior editions Integrated cross referencing to content across chapters

How and Why Does Spatial-Hearing Ability Differ among Listeners? What Is the Role of Learning and Multisensory Interactions? Guillaume Andéol,Brian D. Simpson,Ewan A. Macpherson,2016-08-29 Spatial hearing ability has been found to vary widely across listeners A survey of the existing auditory space perception literature suggests that three main types of factors may account for this variability physical factors e g acoustical characteristics related to sound localization cues perceptual factors e g sensory cognitive processing perceptual learning multisensory interactions and methodological factors e g differences in stimulus presentation methods across studies However the extent to which these and perhaps other still unidentified factors actually contribute to the observed variability in spatial hearing across individuals

with normal hearing or within special populations e.g. hearing impaired listeners remains largely unknown. Likewise the role of perceptual learning and multisensory interactions in the emergence of a multimodal but unified representation of auditory space is still an active topic of research. A better characterization and understanding of the determinants of inter-individual variability in spatial hearing and of its relationship with perceptual learning and multisensory interactions would have numerous benefits. In particular it would enhance the design of rehabilitative devices and of human-machine interfaces involving auditory or multimodal space perception such as virtual auditory multimodal displays in aeronautics or navigational aids for the visually impaired. For this Research Topic we have considered manuscripts that present new methods or review existing methods for the study of inter-individual differences, present new data or review existing data concerning acoustical features relevant for explaining inter-individual differences in sound localization performance, present new or review existing psychophysical or neurophysiological findings concerning spatial hearing and/or auditory perceptual learning and/or multisensory interactions in humans (normal or impaired, young or older listeners) or other species, discuss the influence of inter-individual differences on the design and use of assistive listening devices, rehabilitation or human-machine interfaces involving spatial hearing or multimodal perception of space, ergonomics.
