Drawing Blood Keith Wailoo,2002-10-15 How physicians in this century wielded medical technology to define disease carve out medical specialties and shape political agendas Winner of the American Public Health Association Arthur Viseltear Prize In Drawing Blood medical historian Keith Wailoo uses the story of blood diseases to explain how physicians in this century wielded medical technology to define disease carve out medical specialties and shape political agendas As Wailoo s account makes clear the seemingly straightforward process of identifying disease is invariably influenced by personal professional and social factors and as a result produces not only clarity and precision but also bias and outright error Drawing Blood reveals the ways in which physicians and patients as well as the diseases themselves are simultaneously shaping and being shaped by technology medical professionalization and society at large This thought provoking cultural history of disease medicine and technology offers an important perspective for current discussions of HIV and AIDS genetic blood testing prostate specific antigen and other important issues in an age of

technological medicine Makes clear that the high stakes involved in medical technology are not just financial but moral and far reaching They have been harnessed to describe clinical phenomena and to reflect social and cultural realities that influence not only medical treatment but self identity power and authority Susan E Lederer H Net Humanities Social Sciences On Line Wailoo s masterful study of hematology and its disease discourse is a model of interdisciplinarity combining cultural analysis social history and the history of medical ideas and technology to produce a complex narrative of disease definition diagnosis and treatment He reminds us that medical technology is a neutral artifact of history It can be and has been used to clarify and to cloud the understanding of disease and it has the potential both to constrain and to emancipate its subjects Regina Morantz Sanchez Journal of Interdisciplinary History *Environmental Health Perspectives* ,2003

Balch,2012-12-06 What is the best way to plan surgical research What problems are most often encountered in clinical research How should a research report be presented at a scientific meeting These questions and more are all answered in Principles and Practice of Research The second edition has added new sections on animal research models the molecular and cellular dimension of surgical research and practical guidelines for obtaining government and third party funding Other improvements include a friendlier discussion of statistics and updated material about on line computer literature searches This book provides every clinical researcher with a roadmap around the pitfalls of poorly designed studies through the jungle of incomprehensible statistics and over the hurdles of research reporting to a successful study from start to finish From the reviews of the first edition For me it is a bible and a must for every Ph D or M D involved in clinical research especially in the field of surgery It should be on the table not on the book shelf of both the young as well as the experienced investigator as a readily accessible source of information to avoid the trial and error approach to problems in surgical research World Journal of Surgery 1 a carefully conceived concise blend of factual theory and principles practical guidelines and philosophical perspective I have found it hard to identify any omission even a selected bibliography on laboratory animals their care handling and anatomy is included and impossible to single out any individual contribution each is a treasure well written concise and complete The Lancet 2 The feature of the book is that despite attention to detail it maintains a clear and practical approach to the whole field beginning with the reasons for carrying out research the types of research and above all the reporting of research Almost all aspects of research are covered from small retrospective studies to departmental institutional national and international projects The chapter on writing for publication should be compulsory reading for all budding authors Journal of Bone and Joint Surgery 3 A Question of Evidence Colin Evans,2003-01-30 Scientific sleuthing and slip ups in the investigations of fifteen famous cases Ranging from the Turin Shroud and the suspicious death of Napoleon Bonaparte to the murder cases of Dr Sam The Fugitive Sheppard and O J Simpson A Question of Evidence takes readers inside some of the most vexing forensic controversies of all time In each case

Colin Evans lays out the conflicting medical and scientific evidence and shows how it was used or mishandled in reaching a verdict Among the other cases the assassination of JFK the strange history of Alfred Packer the only convicted American cannibal the death of Vatican banker Roberto Calvi and the trials of Lindy Chamberlain the dingo baby case and Dr Jeffrey MacDonald the case recounted in Fatal Vision Though the science of forensics has helped solve a huge number of crimes it is clear from A Question of Evidence that many cases are more open than shut Colin Evans Pembroke UK is the author of the popular Casebook of Forensic Detection Wiley 0 471 28369 X as well as Great Feuds in History Wiley 0 471 38038 5

Hamilton,2014-03-24 There is something sad about a person who blindly sacrifices his life for his country for he is unaware of the real issues If a person can grasp the truth about war it can't help but color his thinking on such issues as draft dodging The name draft dodger suggests the evasion of a just debt or obligation In reality a draft dodger is either a person who rejects military service on religious or moral grounds or plainly doesn't want to allow himself to be killed Any of those reasons should be good enough and I don't think that he should be persecuted or prosecuted A person who is willing to sacrifice his life for his country is merely a dupe in the profit game of the military industrial complex A man who has the courage to stand up against such twisted idealism and refuse to be sacrificed for profiteers is no coward My opinion of the draft dodger differs from the opinion of many of my peers but then my generation is probably one of the biggest collections of fools on record Major Ralph E Hamilton WW2 Veteran 1976
