Effects of Tutorial and Animated Media Instructional Strategies on Achievement and Retention of Secondary School Students in Computer Studies Dr. Anusiuba Overcomer Ifeanyi Alex, Dr. Ashoka S. B., Paul, Roseline Uzoamaka, 2022-12-21 The study was led by six research questions and six hypotheses were examined at a significance level of 0.05. The quasi experimental design was used notably the non equivalent control group design for the pretest and posttest. 4873 senior secondary school students in the Nnewi Education Zone of the state of Anambra make up the study's population. In the study, 273 percent of the population was used. A sample of 133 Nnewi Education Zone SS2 computer science students was used. The Computer Studies Department and one knowledgeable computer studies teacher from Nnewi Kudder Richardson Formula 20 was used to determine the instrument's reliability. The CSAT was used as a pretest and posttest to gather data. Three weeks following the post test, the retention test was given. The results demonstrated that a lesson followed by animated media education greatly improved students' computer science performance. When compared to the traditional approach, only tutorials considerably increased students' retention; however, this improvement was not significant when compared to animated media. The study concluded that tutorials are successful at raising students' achievement and retention. The use of animated material in the classroom has been shown to improve student achievement. **Resources in Education**, 1999-04

Visual Mathematics and Cyberlearning Dragana Martinovic, Viktor Freiman, Zekeriya Karadag, 2012-12-24 This first book in the series will describe the Net Generation as visual learners who thrive when surrounded with new technologies and whose needs can be met with the technological innovations. These new learners seek novel ways of studying such as collaborating with peers, multitasking as well as use of multimedia, the Internet and other Information and Communication Technologies. Here we present mathematics as a contemporary subject that is engaging, exciting and enlightening in new ways. For example, in the distributed environment of cyber space, mathematics learners play games, watch presentations on YouTube, create Java applets of mathematics simulations and exchange thoughts over the Instant Messaging tool. How should mathematics education resonate with these learners and technological novelties that excite them? 32 Quick and Fun Content Area Computer Activities Grade 4 Kathy Kopp, 2006-02 Incite 4th grade students' enthusiasm to learn using technology in the curriculum. Visualization in Mathematics, Reading and Science Education Linda M. Phillips, Stephen P. Norris, John S. Macnab, 2010-09-02 Science education at school level worldwide faces three perennial problems that have become more pressing of late These are to a considerable extent interwoven with concerns about the entire school curriculum and its reception by students The first problem is the increasing intellectual isolation of science from the other subjects in the school curriculum Science is too often still taught didactically as a collection of pre determined truths about which there can be no dispute As a consequence many students do not feel any ownership of these ideas Most other school subjects do somewhat better in these regards For example in language classes students suggest different interpretations of a text and then debate the relative merits of the cases being put forward Moreover

ideas that are of use in science are presented to students elsewhere and then re taught often using different terminology in science For example algebra is taught in terms of x y z in mathematics classes but students are later unable to see the relevance of that to the meaning of the universal gas laws in physics where p v t are used The result is that students are confused and too often alienated leading to their failure to achieve that extraction of an education from a scheme of instruction which Jerome Bruner thought so highly desirable *Microtimes* ,2000
