

A woman with long brown hair, wearing a green shirt, is sitting at a wooden desk. She is looking directly at the camera with a slight smile, her hand resting on her chin. In front of her is a silver laptop. To her left is a large potted plant with broad green leaves. To her right is a smaller potted plant with thin, feathery leaves. The background is a light-colored wall with a framed abstract painting. A purple banner with yellow and white text is overlaid on the bottom half of the image.

I know there are more than sufficient resources online to teach absolute beginners everything they need to learn web development from scratch. But this book is different because it addresses a few web development problems. The credibility of a web developer is much more than their credentials. It's actually about the strength of their portfolio. Employment opportunities often come from work samples and concrete skills rather than a college degree. So you need to learn well enough. With this book and my dedicated 24/7 help and support team, there's nothing for you to fear. I have helped many web developers update their development skills, launch successful careers, and get hired for remote jobs. I notice that even the most ambitious beginners can run into problems such as unable to decide where to begin. Sometimes they get completely lost on the way and therefore need further help. The truth is everyone needs help at one point or the other to learn HTML5, CSS, or Javascript correctly in their web development journey.
