**Davenport-Zannier Polynomials and Dessins d'Enfants** Nikolai M. Adrianov, Fedor Pakovich, Alexander K. Zvonkin, 2020-06-29 The French expression *dessins d'enfants* means children s drawings This term was coined by the great French mathematician Alexandre Grothendieck in order to denominate a method of pictorial representation of some highly interesting classes of polynomials and rational functions The polynomials studied in this book take their origin in number theory The authors show how by drawing simple pictures one can prove some long standing conjectures and formulate new

ones The theory presented here touches upon many different fields of mathematics The major part of the book is quite elementary and is easily accessible to an undergraduate student The less elementary parts such as Galois theory or group representations and their characters would need a more profound knowledge of mathematics The reader may either take the basic facts of these theories for granted or use our book as a motivation and a first approach to these subjects

**Descriptive Complexity of Formal Systems** Michal Hospodár, Galina Jirásková, Stavros Konstantinidis, 2019-07-08 This book constitutes the proceedings of the 21st International Conference on Descriptive Complexity of Formal Systems DCFS 2019 held in Košice Slovakia in July 2019 The 18 full papers presented in this volume were carefully reviewed and selected from 25 submissions The book also contains 4 invited talks They deal with all aspects of descriptive complexity and costs of description of objects in various computational models such as Turing machines pushdown automata finite automata grammars and others *Official Gazette of the United States Patent and Trademark Office*, 2005 **Low-Rank and Sparse Modeling for Visual Analysis** Yun Fu, 2014-10-30 This book provides a view of low rank and sparse computing especially approximation recovery representation scaling coding embedding and learning among unconstrained visual data The book includes chapters covering multiple emerging topics in this new field It links multiple popular research fields in Human Centered Computing Social Media Image Classification Pattern Recognition Computer Vision Big Data and Human Computer Interaction Contains an overview of the low rank and sparse modeling techniques for visual analysis by examining both theoretical analysis and real world applications **Willing's Press Guide and Advertisers' Directory and Handbook**, 1989 *Trees of Hyperbolic Spaces* Michael Kapovich, Pranab Sardar, 2024-08-15 This book offers an alternative proof of the Bestvina Feighn combination theorem for trees of hyperbolic spaces and describes uniform quasigeodesics in such spaces As one of the applications of their description of uniform quasigeodesics the authors prove the existence of Cannon Thurston maps for inclusion maps of total spaces of subtrees of hyperbolic spaces and of relatively hyperbolic spaces They also analyze the structure of Cannon Thurston laminations in this setting Furthermore some group theoretic applications of these results are discussed This book also contains background material on coarse geometry and geometric group theory **The Year That Broke Politics** Luke A. Nichter, 2023-08-01 The unknown story of the election that set the tone for today's fractured politics A fresh authoritative analysis of a pivotal election year Kirkus Reviews The 1968 presidential race was a contentious battle between vice president Hubert Humphrey Republican Richard Nixon and former Alabama governor George Wallace The United States was reeling from the assassinations of Martin Luther King Jr and Robert F Kennedy and was bitterly divided on the Vietnam War and domestic issues including civil rights and rising crime Drawing on previously unexamined archives and numerous interviews Luke A Nichter upends the conventional understanding of the campaign Nichter chronicles how the evangelist Billy Graham met with Johnson after the president's attempt to reenter the race was stymied by his own party and offered him a deal Nixon if elected would continue Johnson's

Vietnam War policy and also not oppose his Great Society if Johnson would soften his support for Humphrey Johnson agreed  
 Nichter also shows that Johnson was far more active in the campaign than has previously been described that Humphrey's resurgence in October had nothing to do with his changing his position on the war that Nixon's Southern Strategy has been misunderstood since he hardly even campaigned there and that Wallace's appeal went far beyond the South and anticipated today's Republican populism This eye opening account of the political calculations and maneuvering that decided this fiercely fought election reshapes our understanding of a key moment in twentieth century American history

**Access to Scientific Research** David J. Brown, 2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes This book explores from an independent point of view the current state of the STM publishing market new publishing technologies and business models as well as the information habit of researchers the politics of research funders and the demand for scientific research as a public good The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future

**Igusa's  $p$ -Adic Local Zeta Function and the Monodromy Conjecture for Non-Degenerate Surface Singularities** Bart Bories, Willem Veys, 2016-06-21 In 2011 Lemahieu and Van Proeyen proved the Monodromy Conjecture for the local topological zeta function of a non degenerate surface singularity The authors start from their work and obtain the same result for Igusa's  $p$ -adic and the motivic zeta function In the  $p$ -adic case this is for a polynomial  $f \in \mathbb{Z}[x, y, z]$  satisfying  $f(0, 0, 0) = 0$  and non degenerate with respect to its Newton polyhedron we show that every pole of the local  $p$ -adic zeta function of  $f$  induces an eigenvalue of the local monodromy of  $f$  at some point of  $f^{-1}(0) \subset \mathbb{C}^3$  close to the origin Essentially the entire paper is dedicated to proving that for  $f$  as above certain candidate poles of Igusa's  $p$ -adic zeta function of  $f$  arising from so called  $B_1$  facets of the Newton polyhedron of  $f$  are actually not poles This turns out to be much harder than in the topological setting The combinatorial proof is preceded by a study of the integral points in three dimensional fundamental parallelepipeds Together with the work of Lemahieu and Van Proeyen this main result leads to the Monodromy Conjecture

for the p adic and motivic zeta function of a non degenerate surface singularity      Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, Paige Cullen Pullen, 2017-05-25 The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education To ensure consistency across the volume chapter authors review and integrate existing research identify strengths and weaknesses note gaps in the literature and discuss implications for practice and future research The second edition has been fully updated throughout to take into account recent changes to federal laws as well as the most current academic research and an entirely new section has been added on research methods in special education      **Organizational Behavior** Mary Uhl-Bien, Ronald F. Piccolo, John R. Schermerhorn, Jr., 2023-05-23 An accessible and practical discussion of organizational behavior In the newly updated third edition of Organizational Behavior a team of accomplished educators delivers a multidimensional text that combines analysis knowledge personal development and synthesis with useful pedagogical features that bring organizational behavior to life This edition reconsiders organizational behavior from an interdisciplinary vantage point showing students the interdependence of factors that explain human behavior Frequently addressed organizational behavior subjects are considered from within an integrated framework and are employed to answer functionally relevant questions about why people behave the ways in which they do as well as how to effectively influence and manage others
