Consuming Pleasures Daniel Horowitz, 2012-03-15

How is it that American intellectuals who had for 150 years worried about the deleterious effects of affluence more recently began to emphasize pleasure playfulness and symbolic exchange as the essence of a vibrant consumer culture The New York intellectuals of the 1930s rejected any serious or analytical discussion let alone appreciation of popular culture which they viewed as morally questionable Beginning in the 1950s however new perspectives emerged outside and within the United States that challenged this dominant thinking Consuming Pleasures reveals how a group of writers shifted attention from condemnation to critical appreciation critiqued cultural hierarchies and moralistic approaches and explored the symbolic processes by which individuals and groups communicate Historian Daniel Horowitz traces the emergence of these new perspectives through a series of intellectual biographies With writers and readers from the United States at the center the story begins in Western Europe in the early 1950s and ends in the early 1970s when American intellectuals increasingly appreciated the rich inventiveness of popular culture Drawing on sources both familiar and newly discovered this transnational intellectual history plays familiar works off each other in fresh ways Among those whose work is featured are Jürgen Habermas Roland Barthes Umberto Eco Walter Benjamin C. L. R. James David Riesman and Marshall McLuhan Richard Hoggart members of London's Independent Group Stuart Hall Paddy Whannel Tom Wolfe Herbert Gans Susan Sontag Reyner Banham and Robert Venturi and Denise Scott Brown

The Economics of Belonging Martin Sandbu, 2022-05-17 A radical new approach to economic policy that addresses the symptoms and causes of inequality in Western society today Fueled by populism and the frustrations of the disenfranchised the past few years have witnessed the widespread rejection of the economic and political order that Western countries built up after 1945 Political debates have turned into violent clashes between those who want to take their country back and those viewed as defending an elitist broken and unpatriotic social contract There seems to be an increasing polarization of values The Economics of Belonging argues that we should step back and take a fresh look at the root causes of our current challenges In this original engaging book Martin Sandbu argues that economics remains at the heart of our widening inequality and it is only by focusing on the right policies that we can address it He proposes a detailed radical plan for creating a just economy where everyone can belong Sandbu demonstrates that the rising numbers of the left behind are not due to globalization gone too far Rather technological change and flawed but avoidable domestic policies have eroded the foundations of an economy in which everyone can participate and would have done so even with a much less globalized economy Sandbu contends that we have to double down on economic openness while pursuing dramatic reforms involving productivity regional development support for small and medium sized businesses and increased worker representation He discusses how a more active macroeconomic policy education for all universal basic income and better taxation of capital could work together for society's benefit Offering real answers not invective for facing our most serious political issues The Economics of Belonging shows how a better economic system can work for all

Logic of Racial Practice Brock Bahler, 2021-02-08 The title of this collection The Logic of Racial Practice pays homage to the work of Pierre Bourdieu who coined the term habitus to name the pretheoretical embodied dispositions that orient our social interactions and meaningfully frame our lived experience The language of habit uniquely accounts for not only how we are unreflectively conditioned by our social environments but also how we responsibly choose to enact our habits and can change them Hence this collection of essays edited by Brock Bahler explores how white supremacy produces a racialized modality by which we live as embodied beings arguing that race and racism is performative habituated and enacted We do not regularly have to think about race since race is a praxis producing embodied habits that have become sedimented into our ways of being in the world and that instill within us racialized and racist dispositions postures and bodily comportments that inform how we interact with others The construction of race produces a particular bodily formation in which we are shaped to viscerally perceive through a racialized lens images words activities and events without any self reflective conceptualization and which we perpetuate throughout our day to day choices The contributors argue that eradicating racism in our society requires unlearning these racialized habitus and cultivating new anti racist habits Examining Identity in Sports Media Heather L. Olneck, 2024-06-03 Culture Wars in American Education Past and Present Struggles Over the Symbolic Order radically questions norms and values held within US Education and analyses why and how culture wars in American education are intense consequential and recurrent Applying the concept of symbolic order this volume elaborates ways in which symbolic representations are used to draw boundaries allocate status and legitimate the exercise of authority and power within American schooling In particular the book illustrates the terms of inclusion by which full membership in the national community is defined limited and contested It suggests that repetitive patterns in the symbolic order for example the persistence of the representation of

an individualistic basis of American society and polity constrain the reach of progressive change The book examines the World War I era Americanization movement the World War II era Intercultural Education movement the late twentieth century Multicultural Education movement continuing right wing assaults on Ethnic Studies and Critical Race Theory in the first decades of the twenty first century and historical and contemporary conflicts over the incorporation of languages other than Standard English into approved instructional approaches In the context of continuing culture wars in the United States and across the globe this book will be of interest to graduate students and scholars in critical studies of education history of education sociology of education curriculum theory Multicultural Education and comparative education as well as to educators enmeshed in contemporary tensions and conflicts
