Under the skin

The bright colour of a poison dart frog warns predators that its skin contains a lethal poison. Although just a tiny amount would be enough to

kill a large animal, scientists are now investigating some of the substances in the poison to help them to design new medicines.

Answers For Pearson Longman Exploring Science 7:

The School Science Review, 2003 *Design and Technology for Children* Marilyn Fleer, Jane Beverley, 2015-05-20

Design and technology education is now an established field of study in primary schools and in many early childhood centres. Authors Marilyn Fleer and Jane Beverley offer the definitive text on this curriculum area. *Design and Technology for Children 3e* is a comprehensive and innovative account of teaching and research in design and technology education. It gives pre-service and in-service teachers opportunities to reflect upon and further develop their understanding of technology and technological knowledge and to consider several different approaches in a practical and interactive way. The third edition has been written to reflect current research and practice in design and technology education for Australian children and pre-service teachers.

Science and Football A. Mark Williams, 2023-05-22 This book presents a state of the art overview of the science underpinning talent identification and development in the world's most popular sport. It covers a broad range of topics that span the various sub-disciplines of sports science with contributions from some of the foremost scientists and applied practitioners globally. The chapters provide readers with a comprehensive insight into how sport science is helping practitioners to create more evidence-based approaches when attempting to identify and develop future generations of elite players rather than relying on tradition and precedence. This book dispels some of the myths involved in talent identification and highlights how science is playing an ever-increasing role in guiding and shaping the practices used at the most renowned professional clubs across the globe. It is a must-read for anyone involved in the game at any level including sports scientists, medical staff, coaches and administrators. This book was originally published as a special issue of the *Journal of Sports Sciences*.

Smart Sustainable Development: Exploring Innovative Solutions and Sustainable Practices for a Resilient Future Terri-Ann Berry, Leopoldo Mendoza-Espinosa, Jo Burgess, Ferdinand Oswald, 2025-06-17 United Nations Sustainable Development Goals (SDGs) serve as a blueprint to address the world's most pressing challenges such as poverty, inequality, climate change and biodiversity loss. Research plays a pivotal role in understanding these complex issues, providing evidence-based insights to guide policy formulation, program development and implementation strategies. Smart sustainable development refers to an innovative, forward-thinking and/or technologically advanced approach that combines innovative solutions with sustainable practices to promote long-term environmental, social and economic well-being. This Research Topic has been created in collaboration with an international event comprising online and face-to-face opportunities to highlight practical solutions to sustainability in line with the United Nations SDGs. This presents a unique opportunity for a wide range of sustainable practitioners from academia, industry and communities to present research works and projects with an innovation focus, enabling international networking and knowledge sharing to support a more sustainable and inclusive future. This Research Topic seeks to investigate both complete or ongoing projects introducing innovative solutions that are strongly aligned with the UN SDGs and have led to tangible outcomes with remarkable impact and benefit to sustainable development.

The key aspects contributing to smart sustainable development include technological integration environmental stewardship social equity economic prosperity resilient communities and infrastructure and collaboration and governance We welcome contribution from individual researchers academic groups and partnerships between academics and professionals Research focused on using innovation to bridge the gap between global aspirations and local realities taking into account diverse cultural social economic and environmental contexts is particularly welcome Topics can cover but are not limited to the following themes Smart technologies to further sustainable development including in built environment biotechnologies energy systems health care education transportations and emergency and disaster risk management Sustainable infrastructure including policies creative design and the implementation of new methods materials and approaches to the planning construction and use of sustainable buildings water and wastewater management stormwater design and solid waste management Digitalization and intelligence for the uptake of sustainable solutions including through smart energy systems mobility digital transformation and disruption resilience and disaster management and the growth of digital cities Community and healthcare solutions to benefit gender equality community development indigenous peoples and the preservation of local region and national cultural heritage in new ways Nature resource protection and management approaches including environmental conservation water sensitive design coastal erosion systems solutions and adaptation to climate change Sustainable agricultural initiatives to increase the uptake and use of new approaches and methods including ones which incorporate creative solutions to supporting natural ecosystems
