Posamentier, William Farber, Terri L. Germain-Williams, 2013-09-27 100 ways to get students hooked on math It happens to the best of us that one question that's got you stumped Or maybe you have the answer but it's not all that compelling or convincing Al Posamentier and his coauthors to the rescue with this handy reference containing fun answers to students 100 most frequently asked math questions Even if you already have the answers Al's explanations are certain to keep kids hooked and that's what it's all about The questions are all organized around the Common Cores math content standards and relate directly to Numbers and Quantity Functions Algebra Geometry and Statistics and Probability [Thinking Through Mathematics](#) Edward A. Silver, Jeremy Kilpatrick, Beth Schlesinger, Dennie Wolf, 1990 This document focuses on how mathematics teaching and learning can be improved by developing more powerful approaches to connect thinking and mathematics It proposes changing perspectives on what it means to learn and do mathematics and explores how these perspectives can be incorporated into the teaching of secondary school mathematics Chapter 1 offers a view of mathematics as emerging largely from individual and social activity rather than from textbooks worksheets and tradition The learner is depicted as someone who actively constructs meaning instead of passively receiving it Chapter 2 considers how a greater emphasis on communication discussion debate recording and writing stimulates and uncovers students learning and thinking and leads to a deeper understanding by both teachers and students Chapter 3 explores how teachers might encourage greater inquiry and communication in a secondary school class by making minor but thoughtful

provoking changes in ordinary problems and situations Finally chapter 4 gives some practical advice on transforming the mathematics classroom into a place where students are expected not only to absorb and consume mathematics but also to produce and think about it Contains 17 references and 17 figures MKR

**The Work of Mathematics Teacher Educators**  
 Kathleen Lynch-Davis, Robin L. Rider, 2015-10-01 Originally published in 2004 A major focus of teacher education is the development of preservice teachers However it should not be the only focus of those who work in teacher education Educating inservice teachers is equally important and the conversation among those involved in mathematics teacher education needs to include discussion of this group as well This conversation also highlights a need for professional development for teacher educators and research on the development of teacher educators This monograph discusses issues in educating all of these groups of individuals in an effort to continue the conversation among those involved in mathematics teacher education
