

Interview Chemistry Questions And Answers Guide

- Ques:-** What is the difference between a chemical reaction and a physical change?
- Ans:-** A chemical reaction involves the breaking and forming of chemical bonds, resulting in the formation of new substances with different chemical properties. A physical change, on the other hand, involves a change in the physical state or appearance of a substance without any change in its chemical composition.
- Ques:-** What is the difference between a mixture and a compound?
- Ans:-** A mixture is a combination of two or more substances in which the components retain their individual chemical properties. A compound, on the other hand, is a substance formed by the chemical combination of two or more elements in a fixed ratio, resulting in a new substance with different chemical properties.
- Ques:-** What is the difference between a solution and a suspension?
- Ans:-** A solution is a homogeneous mixture of two or more substances in which the components are uniformly distributed. A suspension, on the other hand, is a heterogeneous mixture in which the components are not uniformly distributed and can be separated by physical means.
- Ques:-** What is the difference between a pure substance and a mixture?
- Ans:-** A pure substance is a material that has a constant chemical composition and distinct physical properties. A mixture, on the other hand, is a combination of two or more substances in which the components retain their individual chemical properties.
- Ques:-** What is the difference between a chemical reaction and a physical change?
- Ans:-** A chemical reaction involves the breaking and forming of chemical bonds, resulting in the formation of new substances with different chemical properties. A physical change, on the other hand, involves a change in the physical state or appearance of a substance without any change in its chemical composition.
- Ques:-** What is the difference between a mixture and a compound?
- Ans:-** A mixture is a combination of two or more substances in which the components retain their individual chemical properties. A compound, on the other hand, is a substance formed by the chemical combination of two or more elements in a fixed ratio, resulting in a new substance with different chemical properties.
- Ques:-** What is the difference between a solution and a suspension?
