Henderson provides the best balance of technical and theoretical coverage in any *Financial Accounting* text on the market today with its presentation of real world examples, current debates and the underlying rationale for the accounting concepts demonstrated. Throughout the text, academic studies and professional accounting research are referenced to also provide a critical understanding of historical debates in financial accounting. The new 15th edition covers significant recent developments to the accounting standards in Australia and is based on the AASB standards and interpretations that have been issued up to the end of 2012. This includes the Australian Accounting Standard Board's AASB program of changes to make accounting standards equivalent to International Financial Reporting Standards.
