Silver, Jeremy Kilpatrick, Beth Schlesinger, Dennie Wolf, 1990 This document focuses on how mathematics teaching and learning can be improved by developing more powerful approaches to connect thinking and mathematics It proposes changing perspectives on what it means to learn and do mathematics and explores how these perspectives can be incorporated into the teaching of secondary school mathematics Chapter 1 offers a view of mathematics as emerging largely from individual and social activity rather than from textbooks worksheets and tradition The learner is depicted as someone who actively constructs meaning instead of passively receiving it Chapter 2 considers how a greater emphasis on communication discussion debate recording and writing stimulates and uncovers students learning and thinking and leads to a deeper understanding by both teachers and students Chapter 3 explores how teachers might encourage greater inquiry and communication in a secondary school class by making minor but thoughtful
