14 Many animals have developed courtship behaviors. Males will often dance, swim, or sing in a particular way to attract a female. Males who are more successful at the courtship behavior will have a greater chance of having more offspring. This behavior is a result of

- (1) natural selection
- (2) genetic engineering
- (3) asexual reproduction
- (4) gene manipulation

15 After a zygote is formed, specialization of cells occurs. Through which process do the cells of a zygote become specialized?

- (1) sexual reproduction
- (2) meiosis
- (3) fertilization
- (4) differentiation

16 A farmer wanted to rid his apple trees of a particular leaf-eating insect. He sprayed his trees with an insecticide that killed 98% of the insects. The survival of 2% of this population of insects is most likely due to

- (1) genes obtained from another species
- (2) certain chemicals that stimulated overproduction
- (3) variations that resulted from sexual reproduction
- (4) their ability to produce food from the pesticide

17 Which occurrence represents an example of evolution?

- (2) A mutation in a liver cell causes a person to produce an enzyme that is less efficient.
- (3) Cells in a zygote eventually change into bone cells or skin cells.
- (4) Some antibiotics are almost useless, because pathogens have developed a resistance to these antibiotics.

18 Populations of aspen trees in the western United States are being destroyed by an unexplained illness. The altered landscape is affecting the animals that live there. Populations of deer mice are increasing greatly in these areas. Unfortunately, these mice often carry a virus that is deadly to humans. This scenario best illustrates that

Fundamentals of Computer Networks Matthew N. O. Sadiku, Cajetan M. Akujuobi, 2022-08-29 This textbook presents computer networks to electrical and computer engineering students in a manner that is clearer more interesting and easier to understand than other texts All principles are presented in a lucid logical step by step manner As much as possible the authors avoid wordiness and giving too much detail that could hide concepts and impede overall understanding of the material Ten review questions in the form of multiple choice objective items are provided at the end of each chapter with answers The review questions are intended to cover the little tricks which the examples and end of chapter problems may not cover They serve as a self test device and help students determine how well they have mastered the chapter
