Madden, 2023-10-31 Thinking About Thinking Mind and Meaning in the Era of Techno Nihilism addresses our existential crisis by reminding us of the conditions for meaning that have been obscured by the modern technological mentality Madden weaves together disparate insights from Wittgenstein Hegel Aristotle Heidegger Merleau Ponty Nietzsche Sophocles and others in an attempt to account for our mindedness in terms of its inextricable connection to a world capable of inspiring our care The mind is not a discrete entity locked behind the skull or withdrawn into a ghostly realm but a participation in an inheritance biological and cultural held in common with other participants and taking responsibility for that world is crucial for the meaning The ever increasing technological mediation of our lives undermines this worldliness We are subsequently losing our minds and as our mindedness fades so goes our sense of dignity and value Madden makes this case deploying insights from phenomenology analytic philosophy Aristotelianism neuroscience and cognitive science and along the way confronts the mind body problem freedom artificial intelligence transhumanism and nihilism More importantly he invites the reader into an accessible dialogue concerning issues of grave importance to the meaning of our lives
