Language Intake Carol Griffiths, 2024-11-05 Aimed towards advanced students and researchers in language acquisition and teaching Language Intake Understanding and

Improving Language Learning and Teaching considers the long debated definition of language intake and its determining factors. In doing so it presents a unique argument for language input and intake with a particular focus on how input interaction identity and investment contribute to intake through complex intercommunication. The book defines each of the contributing factors of intake in turn and demonstrates the principles of language intake through interviews with successful language learners in order to encourage teachers to take these factors into consideration so as to maximise intake of the target language. The author proposes that all these multiple factors contribute to what might be called the Intake Hypothesis which can be outlined as a practicable framework to support teachers in providing rich interesting and extensive input affording opportunities for interaction respecting learner identity and offering a motivating environment to encourage and sustain investment of time and effort thereby contributing to intake.

Multilingualism in the Australian Suburbs Ruth Fielding, 2015-04-25 This book introduces a framework for examining bilingual identity and presents the cases of seven individual children from a study of young students bilingual identities in an Australian primary school. The new Bilingual Identity Negotiation Framework brings together three elements that influence bilingual identity development: sociocultural connection investment and interaction. The cases comprise individual stories about seven young bilingual students and are complemented by some more general investigations of bilingual identity from a whole class of students at the school. The framework is explained and supported using the students' stories and offers readers a new concept for examining and thinking about bilingual identity. This book builds upon past and current theories of identity and bilingualism and expands on these to identify three interlinking elements within bilingual identity. The book highlights the need for greater dialogue between different sectors of research and education relating to

languages and bilingualism It adds to the increasing call for collaborative work from the different fields interested in language learning and teaching such as TESOL bilingualism and language education Through the development of the framework and the students stories in this study this book shows how multilingual children in one school in Australia developed their identities in association with their home and school languages This provides readers with a model for examining bilingual identity in their own contexts or a theoretical construct to consider in their thinking on bilingualism language and identity
