

Answer Key To Vista SuperSite Lesson 2

Introduction

Introducing Vista through Windows Setup has always represented a challenge to Vista users. Before Vista, Vista's language support was limited to the Windows XP language pack and the Windows XP Service Pack 2 (SP2) language pack. The Vista language pack was not available until the Windows XP SP2 language pack was released. This meant that Vista users had to wait until the Windows XP SP2 language pack was released to be able to use Vista in their preferred language. This was a significant barrier to Vista adoption, especially for users who did not speak English. The Vista language pack was released on October 26, 2006, and it was the first Vista language pack to be released. This was a significant milestone for Vista, as it showed that Microsoft was committed to making Vista available to users in all languages.

At Vista's launch, users could only use Vista in English. This was a significant barrier to Vista adoption, especially for users who did not speak English. The Vista language pack was released on October 26, 2006, and it was the first Vista language pack to be released. This was a significant milestone for Vista, as it showed that Microsoft was committed to making Vista available to users in all languages.
