HOMWORK MASTERS H-105

Skills MyMathLab

First complete the MyMathLab homework online. Then work the two exercises to check your understanding.

1. Solve $3x + (-1) = -10 + 2x$

2. Solve $2 - 3(x - 4) = 17$

Concepts and Applications

Complete the problems to practice applying the skills and concepts learned in the section.

3. Suppose you are tutoring a friend on solving basic equations. She wants a procedure or a list of steps to follow as a guideline. What should you tell her? Write at least three steps.

4. Suppose there is an equation in which the following operations have been performed on x , in this order:

1. Multiply by 8
2. Square both sides
3. Subtract 2

List the operations you would need to do to solve the equation for x , in the order you would do them.

The following solutions are examples of student work. For each example, state whether the student's method is correct and whether or not it is efficient. If the method is not efficient, show a better solution.

Mathematics Education of our Students M. Vali Siadat, 2022-10-19

About this Book: This book introduces an innovative model in teaching and learning of mathematics. It is the result of nearly two decades of research in math education at the college. Its main premise is that all students can learn math provided they are engaged in the learning process. The award-winning Keystone model, as is thoroughly described in the book, has produced significant student outcomes not only in mathematics but also in English reading comprehension. The research has had consistent results during the years of study.

About the Author: M. Vali Siadat is a distinguished professor of mathematics at Richard J. Daley College. He has two doctorates in mathematics: a Ph.D. in pure mathematics and a D.A. in mathematics education. Dr. Siadat has more than thirty publications in mathematics and mathematics education and has had numerous presentations at regional, national, and international mathematics meetings and conferences. Professor Siadat is the recipient of several national awards, including the 2019 Award for Impact on the Teaching and Learning of Mathematics conferred by the American Mathematical Society, the 2009 Mathematical Association of America's Deborah and Franklin Tepper Haimo Award for Distinguished College or University Teaching of Mathematics, and the 2005 Carnegie Foundation for the Advancement of Teaching Illinois Professor of the Year Award.

Student Writing in the Quantitative Disciplines Patrick Bahls, 2012-03-06

Designing interesting problems and writing assignments is one of the chief tasks of all teachers, but it can be especially challenging to translate and apply learning theory, good teaching techniques, and writing assignments into STEM and other quantitative disciplines. *Student Writing in the Quantitative Disciplines* offers instructors in math-based disciplines meaningful approaches to making their coursework richer and more relevant for their students, as well as satisfying institutional imperatives for writing curricula. This important resource provides instructors with the hands-on skills needed to guide their students in writing well in quantitative courses at all levels of the college curriculum and to promote students' general cognitive and intellectual growth. Comprehensive in scope, the book includes ideas for using writing as a means of learning mathematical concepts, illustrative examples of effective writing activities and assignments in a number of different genres, assessment criteria, and effective strategies for responding to

students writing Examples of ways to help students engage in peer review revision and resubmission of their written work Those of us who spend our lives urging faculty in all disciplines to integrate more writing into their courses have wished for the day when someone like Patrick Bahls would step forward with a book like this one Chris M Anson University Distinguished Professor and director Campus Writing and Speaking Program North Carolina State University Written by a mathematician this readable theoretically sound book describes practical strategies for teachers in the quantitative sciences to assign and respond to students writing It also describes numerous approaches to writing that engage students in disciplinary learning collaborative discovery and effective communication Art Young Campbell Professor of English emeritus Clemson University Loaded with practical advice this timely important and engaging book will be an invaluable resource for instructors wishing to bring the benefits of writing to learn to the quantitative disciplines As a mathematician thoroughly grounded in writing across the curriculum scholarship Bahls brings humor classroom experience and pedagogical savvy to a mission he clearly loves improving the quality of student learning in math and science John C Bean professor Seattle University and author Engaging Ideas
