Making Compost Making a Worm Farm Herbal Plants in Your Raised Garden Staggered Harvests Lasagna Gardening Conclusion Author Bio Introduction The first time I came across an example of raised bed gardening my reaction was that is an extremely sensible way of gardening you do not have to stoop down to ground level I was seeing these raised garden beds in a friend's home She loved gardening She also had back trouble So crouching down in front of her beloved flower and vegetable as well as herbal garden in order to de-weed them was purgatory to her And then her handy do-it-yourself practical husband said Why don't we raise the crops and plants in beds which are waist high And he immediately set about building 4 feet wide beds in square shaped blocks with wood The soil was raised above ground level and placed in that wooden frame The results were amazing It was only 10 years later that I found out that raised bed gardening was being practiced extensively all over the world Avid gardeners were making bed frames out of concrete rock and even wood They made the containers to their own particular requirements with dimensions ranging from 1.0 m to 2 m depending on the space they had Gardening in containers is all very well but raised gardening eliminates the use of pots And best of all as my friend told me I do the gardening on my raised bed Himself her enthusiastic DIY gardener husband plans to plant plants which love the shade under the raised beds In that way we are utilizing every inch of the soil as well as lots of space above ground level What a sensible way to make gardens in limited spaces She has the right of it And this is possibly the reason why so many people want to know all about raised bed gardening in rich organic compost laden soil So as you are one of them let us start with how we can utilize every square inch of our land economically and beneficially by making raised beds how to make them how to take care of them and how to enjoy their harvest I definitely advocate natural methods for gardening so I am going to tell you about the best organic and natural gardening practices which people all over the world have been using for centuries Take advantage of our technology in other aspects of gardening like watering etc but still use the old natural methods for fertilizing the soil

It was in the 1980s that the word sustainability in regard to an environment began to be associated with nature environment agriculture and thus gardening Horticulturalists believing in sustainable agriculture decided that it was easier for humans to use natural resources in a way to get better yields They have been doing this for millenniums However this drain on the natural resources was going to cause the depreciation of such resources one time or the other because mother nature cannot keep nourishing and replenishing her without getting back something of what she gave And this gave rise to the concept of sustainable gardening Harvesting things you have grown your own self from your garden is such a positive feeling of achievement The idea was that use what you can from nature s bounty and then give back to her what you can so that you and she work in tandem in a symbiotic relationship So all of us home gardeners can use sustainable gardening tips to make beautiful gardens with eco friendly designs use of biodegradable materials use of organic fertilizer and using native plants to sustain the environment and make a sustainable garden A fruitful harvest is a lovesome thing God Wot 14th century saying When I was being taught agronomy at college in the 80s nobody bothered about sustainable gardening That was because in the East the traditional agricultural practices were with the use of natural resources because the agricultural traditions still belong to the middle 14 century in many parts of the country That is why what is considered sustainable and organic gardening in the West today was an integral part of human existence in the Indian subcontinent at that time We used organic fertilizer We did not know about chemical pesticides or hormones On the flipside we did not know about agricultural development which was taking place all over the world to get a better yield of food and crops And that is why we relied on

just the monsoon to feed our crops and prayed to the rain God If he did not come on time we would be sunk The bank and the money lender would take our land and then there would be no resort but to starve or go to the city to survive or lend ourselves out in bonded labor to a more prosperous farmer This may sound shocking to people in well developed countries but this is still the sort of existence which is being led by people in many parts of the world Even today in this day of state of the art technology and technological development underdeveloped countries still follow obsolete agricultural practices which do not take into account the natural resources already around them And so famine has been a part of their lives for centuries So here are some rules which you are going to implement right now to make sustainable gardening possible **Balcony**
